Dell Latitude E7450
Owner's Manual
Notes, cautions, and warnings

**NOTE:** A NOTE indicates important information that helps you make better use of your product.

**CAUTION:** A CAUTION indicates either potential damage to hardware or loss of data and tells you how to avoid the problem.

**WARNING:** A WARNING indicates a potential for property damage, personal injury, or death.

Before Working Inside Your Computer

Use the following safety guidelines to help protect your computer from potential damage and to help to ensure your personal safety. Unless otherwise noted, each procedure included in this document assumes that the following conditions exist:

- You have read the safety information that shipped with your computer.
- A component can be replaced or—if purchased separately—installed by performing the removal procedure in reverse order.

⚠️ **WARNING:** Disconnect all power sources before opening the computer cover or panels. After you finish working inside the computer, replace all covers, panels, and screws before connecting to the power source.

⚠️ **WARNING:** Before working inside your computer, read the safety information that shipped with your computer. For additional safety best practices information, see the Regulatory Compliance Homepage at www.dell.com/regulatory_compliance

⚠️ **CAUTION:** Many repairs may only be done by a certified service technician. You should only perform troubleshooting and simple repairs as authorized in your product documentation, or as directed by the online or telephone service and support team. Damage due to servicing that is not authorized by Dell is not covered by your warranty. Read and follow the safety instructions that came with the product.

⚠️ **CAUTION:** To avoid electrostatic discharge, ground yourself by using a wrist grounding strap or by periodically touching an unpainted metal surface, such as a connector on the back of the computer.

⚠️ **CAUTION:** Handle components and cards with care. Do not touch the components or contacts on a card. Hold a card by its edges or by its metal mounting bracket. Hold a component such as a processor by its edges, not by its pins.

⚠️ **CAUTION:** When you disconnect a cable, pull on its connector or on its pull-tab, not on the cable itself. Some cables have connectors with locking tabs; if you are disconnecting this type of cable, press in on the locking tabs before you disconnect the cable. As you pull connectors apart, keep them evenly aligned to avoid bending any connector pins. Also, before you connect a cable, ensure that both connectors are correctly oriented and aligned.

⚠️ **NOTE:** The color of your computer and certain components may appear differently than shown in this document.

To avoid damaging your computer, perform the following steps before you begin working inside the computer.

1. Ensure that your work surface is flat and clean to prevent the computer cover from being scratched.
2. Turn off your computer (see Turning off Your Computer).
3. If the computer is connected to a docking device (docked), undock it.
   - **CAUTION:** To disconnect a network cable, first unplug the cable from your computer and then unplug the cable from the network device.
4. Disconnect all network cables from the computer.
5. Disconnect your computer and all attached devices from their electrical outlets.
6. Close the display and turn the computer upside-down on a flat work surface.
   - **NOTE:** To avoid damaging the system board, you must remove the main battery before you service the computer.
7. Remove the base cover.
8. Remove the main battery.
9. Turn the computer top-side up.
10. Open the display.
11. Press and hold the power button for few seconds, to ground the system board.
CAUTION: To guard against electrical shock, always unplug your computer from the electrical outlet before opening the display.

CAUTION: Before touching anything inside your computer, ground yourself by touching an unpainted metal surface, such as the metal at the back of the computer. While you work, periodically touch an unpainted metal surface to dissipate static electricity, which could harm internal components.

12 Remove any installed ExpressCards or Smart Cards from the appropriate slots.

## Turning Off Your Computer

**CAUTION:** To avoid losing data, save and close all open files and exit all open programs before you turn off your computer.

1. Shut down the operating system:
   - In Windows 8 (touch-enabled device):
     1. Swipe in from the right edge of the screen, opening the Charms menu and select **Settings**.
     2. Select the ‍ ‍ and then select **Shut down**.
   - Using a mouse:
     1. Point to upper-right corner of the screen and click **Settings**.
     2. Click the ‍ ‍ and select **Shut down**.
   - In Windows 7:
     1. Click **Start**.
     2. Click **Shut Down**.

Or

1. Click **Start**.
2. Click the arrow in the lower-right corner of the **Start** menu as shown below, and then click **Shut Down**.

2. Ensure that the computer and all attached devices are turned off. If your computer and attached devices did not automatically turn off when you shut down your operating system, press and hold the power button for about 6 seconds to turn them off.

## After working inside your computer

After you complete any replacement procedure, ensure that you connect external devices, cards, and cables before turning on your computer.

**CAUTION:** To avoid damage to the computer, use only the battery designed for this particular Dell computer. Do not use batteries designed for other Dell computers.

1. Connect any external devices, such as a port replicator or media base, and replace any cards, such as an ExpressCard.
2. Connect any telephone or network cables to your computer.

**CAUTION:** To connect a network cable, first plug the cable into the network device and then plug it into the computer.

3. Connect your computer and all attached devices to their electrical outlets.
4. Turn on your computer.
Docking Your Computer

Follow the steps to dock your computer:

a. Place the docking spacer until the docking spacer clicks in its place in the docking station.
b. Place the computer on the docking spacer to dock your computer.

**NOTE:** This docking spacer can be used to dock only the Latitude E7250 / Latitude E7450 computers. You cannot dock any other Dell computers using this docking station.

**NOTE:** The docking spacer and the dock are optional items and do not ship standard with the computer.
Recommended Tools

The procedures in this document may require the following tools:

- Small flat-blade screwdriver
- Phillips screwdriver
- Small plastic scribe

Screw size list

The following table shows the screw list for the Latitude E7450 for different components:

## Removing the Battery

1. Follow the procedures in *Before Working Inside Your Computer*.
2. Slide the release latch to unlock the battery.
3. Remove the battery from the computer.
Installing the Battery

1. Slide the battery into its slot until it clicks into place.
2. Follow the procedures in After Working Inside Your computer.

Removing the Base Cover

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove battery.
3. Perform the following steps as shown in the illustration:
   a. Remove the screws that secure the base cover to the computer [1].
   b. Slide the base cover to release it from the computer [2].
4. Remove the base cover from the computer.

Installing the Base Cover

1. Place the base cover to align with the screw holes correctly on the computer.
2. Tighten the screws to secure the base cover to the computer.
3. Install the battery.
4. Follow the procedures in After Working Inside Your computer.
Removing the Hard Drive

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove:
   a. battery
   b. base cover
3. Perform the following steps as shown in the illustration:
   a. Disconnect the hard-drive cable from the computer [1].
   b. Remove the screws that secure the hard-drive bracket to the hard drive [2].
   c. Remove the hard-drive bracket to release the hard drive [3].

4. Remove the hard drive from the computer.

Installing the Hard Drive

1. Place the hard drive inside the computer.
2. Place the hard-drive bracket on the hard drive.
3. Tighten the screws to secure the hard drive to the computer.
4. Connect the hard-drive cable to its connector on the system board.
5. Install:
   a. base cover
   b. battery
6. Follow the procedures in After Working Inside Your computer.
Removing the Coin-Cell Battery

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove:
   a. battery
   b. base cover
3. Perform the following steps as shown in the illustration:
   a. Disconnect the coin-cell cable from its connector on the system board [1].
   b. Pry the coin-cell to remove from the computer [2].

Installing the Coin-Cell Battery

1. Insert the coin-cell battery to its place on the computer.
2. Connect the coin-cell battery cable to its connector on the system board.
3. Install:
   a. base cover
   b. battery
4. Follow the procedures in After Working Inside Your computer.

Removing the mSATA SSD

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove:
   a. battery
   b. base cover
3. Perform the following steps as shown in the illustration:
   a. Remove the screw that secures the mSATA SSD card to the computer [1].
   b. Lift and remove the mSATA SSD card from the computer [2].
Installing the mSATA SSD

1. Place the mSATA SSD card in its slot in the computer.
2. Tighten the screw to secure the mSATA SSD card to the computer.
3. Install:
   a. base cover
   b. battery
4. Follow the procedures in After Working Inside Your computer.

Removing the memory module

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove:
   a. battery
   b. base cover
3. Pry the retention clips from the memory module.
4. Remove the memory module from the system.
Installing the memory module

1. Follow the procedures in After Working Inside Your Computer.
2. Install:
   a. battery
   b. base cover
3. Insert the memory in the memory socket.
4. Press the memory until the securing clips secures it. If there is a second memory to be installed in DIMM B slot, repeat steps 1 and 2.
5. Replace the pre-removal parts in descending order.

Removing the WWAN Card

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove:
   a. battery
   b. base cover
3. Perform the following steps as shown in the illustration:
   a. Disconnect the WWAN cables from their connectors on the WWAN card [1].
   b. Remove the screw that secures the WWAN card to the computer [2].
   c. Remove the WWAN card from the computer [3].

Installing the WWAN Card

1. Place the WWAN card into its slot on the computer.
2. Tighten the screw to secures the WWAN card to the computer.
3. Connect the WWAN cables to their connectors on the WWAN card.
4. Install:
   a. base cover
   b. battery
5. Follow the procedures in After Working Inside Your computer.

Removing the WLAN Card

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove:
   a. battery
   b. base cover
3. Perform the following steps as shown in the illustration:
   a. Remove the screw that secures the WLAN card to the computer [1].
   b. Remove the metal bracket that secures the WLAN cables [2].
   c. Disconnect the WLAN cables from their connectors on the WLAN card [3].
d Remove the WLAN card from the computer [4].

Installing the WLAN Card

1. Place the WLAN card into its slot on the computer.
2. Connect the WLAN cables to their connectors on the WLAN card.
3. Replace the metal bracket on the WLAN card.
4. Tighten the screw to secure the WLAN card to the computer.
5. Install:
   a. base cover
   b. battery
6. Follow the procedures in After Working Inside Your computer.

Removing the System Fan

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove:
   a. battery
   b. base cover
3. Perform the following steps as shown in the illustration:
   a. Disconnect the system-fan cable from its connector on the system board [1].
   b. Remove the screws that secure the system fan to the computer [2].
   c. Remove the system fan from the computer [3].

Installing the System Fan

1. Place the system fan into its slot on the computer.
2. Tighten the screws to secure the system fan to the computer.
Connect the system-fan cable to the computer.

Install:
- base cover
- battery

Follow the procedures in After Working Inside Your computer.

Removing the Display Bezel

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove the battery.
3. Pry the edges to release the display bezel from the display assembly.

4. Remove the display bezel from the display assembly.

Installing the Display Bezel

1. Place the display bezel on the display assembly.
2. Starting from the top corner, press on the display bezel and work around the entire bezel until it click on the display assembly.
3. Install the battery.
4. Follow the procedures in After Working Inside Your computer.
Removing the Display Panel

1. Follow the procedures in Before Working Inside Your Computer.

2. Remove:
   a. battery
   b. display bezel

3. Perform the following steps as shown in the illustration:
   a. Remove the screws that secure the display panel to the display assembly [1].
   b. Lift the display panel to access the eDP cable [2].

4. Peel the adhesive tape [1] to access the eDP cable [2].

5. Perform the following steps as shown in the illustration:
   a. Disconnect the eDP cable from its connector on the display assembly [2].
   b. Remove the display panel from the display assembly [3].
Installing the Display Panel

1. Connect the eDP to its connector on the display panel and affix the adhesive tape.
2. Place the display panel to its original position on the display assembly.
3. Tighten the screws to secure the display panel to the display assembly.
4. Install:
   a. display bezel
   b. battery
5. Follow the procedures in After Working Inside Your computer.

Removing the Camera

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove:
   a. battery
   b. display bezel
   c. display panel
3. Perform the following steps as shown in the illustration:
   a. Disconnect the camera cable from its connector on the display assembly [1].
   b. Remove the camera from the display assembly [2].
Installing the Camera

1. Install the camera into its slot on the display panel.
2. Connect the camera cable to its connector on the display assembly.
3. Install:
   a. display panel
   b. display bezel
   c. battery
4. Follow the procedures in After Working Inside Your computer.

Removing the Keyboard Trim

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove the battery.
3. Using a plastic scribe, pry the keyboard trim from its edges to release it from the keyboard.
4. Remove the keyboard trim from the keyboard.
Installing the Keyboard Trim

1. Insert the keyboard trim on the keyboard.
2. Press along the sides of the keyboard trim until it clicks in place.
3. Install battery.
4. Follow the procedures in After Working Inside Your computer

Removing the Keyboard

1. Follow the procedures in Before Working Inside Your Computer
2. Remove:
   a. battery
   b. base cover
   c. keyboard trim
3. Perform the following steps as shown in the illustration:
   a. Peel the adhesive tape to access the keyboard cable [1].
   b. Disconnect the keyboard cable from its connector on the system board [2] [3].
4. Remove the screws that secure the keyboard to the computer.
Perform the following steps as shown in the illustration:

a. Pry the keyboard to release it from the computer [1]
b. Remove the keyboard from the computer [2].

Installing the Keyboard

1. Place the keyboard to align with the screw holders to the computer.
2. Tighten the screws to secure the keyboard on the palmrest.
3. Connect the keyboard cable to its connector on the system board.
4. Install:
   a. keyboard trim
   b. base cover
   c. battery
5. Follow the procedures in After Working Inside Your computer

Removing the Palmrest

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove:
   a. battery
   b. base cover
   c. keyboard trim
   d. keyboard
3. Remove the screws that secure the palmrest to the computer.
4 Perform the following steps as shown in the illustration:
   a Flip the computer.
   b Disconnect touchpad and power LED cables from their connectors on the system board [1] [2].
   c Remove the screws that secure palmrest to the computer [3].

5 Perform the following steps as shown in the illustration:
   a Pry the edges of the palmrest assembly [1]
   b Remove the palmrest from the computer [2].
Installing the Palmrest

1. Align the palmrest to its original position on the computer until it snaps in its place.
2. Connect the power LED and touchpad cables to their connectors on the system board.
3. Tighten the screws to secure the palmrest to the front of the computer.
4. Flip the computer and tighten the screws to secure the palmrest to the computer.
5. Install:
   a. keyboard
   b. keyboard trim
   c. base cover
   d. battery
6. Follow the procedures in After Working Inside Your computer.

Removing the Speakers

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove:
   a. battery
   b. base cover
   c. hard drive
   d. keyboard trim
   e. keyboard
   f. palmrest
3. Perform the following steps as shown in the illustration:
   a. Disconnect the speaker cable from its connector on the system board [1].
   b. Release the speaker cables from their routing channels [2].
Perform the following steps as shown in the illustration:
   a  Remove the screws that secure the speakers to the computer [1].
   b  Remove the speakers from the computer [2].

Installing the Speaker

1  Align the speakers to their original position and tighten the screws to secure the speakers to the computer.
2  Route the speaker cables to their routing channels on the computer.
3  Connect the speaker cable to its connector on the system board.
4  Install:
   a  palmrest
   b  keyboard
   c  keyboard trim
   d  hard drive
   e  base cover
   f  battery
5  Follow the procedures in After Working Inside Your computer.

Removing the I-O Board

1  Follow the procedures in Before Working Inside Your Computer.
2  Remove:
   a  battery
Perform the following steps as shown in the illustration:

a. Disconnect the I/O board cable from its connector on the system board [1] [2].

b. Remove the screws that secure the I/O board to the computer [3].

c. Remove the I/O board from the computer [4].

Installing the I-O Board

1. Insert the I/O board to its place on the computer.
2. Tighten the screws to secure the I/O board to the computer.
3. Connect the I/O board cable to its connector on the system board.
4. Install:
   a. palmrest
   b. keyboard
   c. keyboard trim
   d. hard drive
   e. base cover
   f. battery
5. Follow the procedures in After Working Inside Your computer.

Removing the Display-Hinge Cover

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove:
   a. battery
   b. base cover
   c. keyboard trim
   d. keyboard
   e. palmrest
3. Remove the screws that secure the display-hinge covers to the computer.
Perform the following steps as shown in the illustration:

a. Remove the screws that secure display-hinge covers to the computer [1].
b. Remove the display-hinge covers from the computer [2].

Installing the Display-Hinge Cover

1. Place the display-hinge covers on the system and tighten the screws to secure the display-hinge covers to the computer.
2. Tighten the screws to secure the display-hinge covers at the back of the computer.
3. Install:
   a. palmrest
   b. keyboard
   c. keyboard trim
   d. base cover
   e. battery
4. Follow the procedures in After Working Inside Your computer.

Removing the Display Assembly

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove:
   a. battery
   b. base cover
   c. keyboard trim
3 Release the WWAN and WLAN cables from their routing channels.

4 Perform the following steps as shown in the illustration:
   a Release the screw to release the metal bracket that secures the display-assembly cable [1].
   b Remove the metal bracket to access the display-assembly cable [2].
   c Disconnect the display-assembly cables from their connectors on the system board [3] [4].

5 Pull the WLAN, WWAN and display-assembly cables from the holes on the base chassis that secure the display assembly to the computer.
Perform the following steps as shown in the illustration:
   a. Remove the screws that secure the display assembly to the computer [1].
   b. Lift the display assembly to remove from the computer [2].

Installing the Display Assembly

1. Route the WWAN, WLAN, and display-assembly cables through their respective routing channels on the base chassis and connect to their connectors.
2. Place the display assembly onto the computer.
3. Tighten the screws to secure the display assembly to the computer.
4. Place the metal bracket on the display-assembly cable and tighten the screw to secure the display-assembly cable.
5. Install:
   a. palmrest
   b. hard drive
   c. keyboard
   d. keyboard trim
   e. base cover
   f. battery
Follow the procedures in After Working Inside Your computer.

Removing the System Board

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove:
   a. battery
   b. base cover
   c. keyboard trim
   d. keyboard
   e. hard drive
   f. palmrest
   g. WWAN card
   h. WLAN card
   i. hinge cover
   j. display assembly
5. Perform the following steps as shown in the illustration:
   a. Remove the screws that secure the system board to the computer chassis [1].
   b. Remove the system board from the computer chassis [2].
Installing the System Board

1. Place the system board on the computer chassis to align it with the screw holders.
2. Tighten the screws to secure the system board to the computer chassis.
3. Connect the speaker and I/O board cables to their connectors on the system board.
4. Connect the hard-drive cable and power-connector port cable to their connectors on the system board.
5. Install:
   a. display assembly
   b. hinge cover
   c. WLAN card
   d. WWAN card
   e. palmrest
   f. hard drive
   g. keyboard trim
   h. keyboard
   i. base cover
   j. battery
6. Follow the procedures in After Working Inside Your computer.

Removing the Heatsink

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove:
   a. battery
   b. base cover
   c. keyboard trim
   d. keyboard
   e. palmrest
   f. hard drive
   g. WWAN card
   h. WLAN card
   i. display assembly
   j. system fan
   k. system board
Perform the following steps as shown in the illustration:

a. Remove the screws that secure the heatsink to the system board [1].

b. Remove the heatsink from the system board [2].

---

**Installing the Heatsink**

1. Place the heatsink into its original position on the system board.
2. Tighten the screws to secure the heatsink to the system board.
3. Install:
   a. system board
   b. system fan
   c. display assembly
   d. WLAN card
   e. WWAN card
   f. hard drive
   g. palmrest
   h. keyboard
   i. keyboard trim
   j. base cover
   k. battery
4. Follow the procedures in After Working Inside Your computer.

---

**Removing the Power-Connector Port**

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove:
   a. battery
   b. base cover
   c. keyboard trim
   d. keyboard
   e. palmrest
   f. hard drive
   g. WWAN card
   h. WLAN card
   i. hinge cover
   j. display assembly
   k. camera
   l. coin cell battery
Perform the following steps as shown in the illustration:
   a. Remove the screws to release the metal bracket that secure the power-connector port [1].
   b. Remove the metal bracket from the power-connector port [2].
   c. Remove the power-connector port from the computer chassis [3].

1. Insert the power connector in its slot on the computer chassis.
2. Place the metal bracket on the power-connector port.
3. Tighten the screws to secure the power-connector port to the computer chassis.
4. Install:
   a. system board
   b. system fan
   c. speaker
   d. I/O board
   e. coin cell battery
   f. camera
   g. display assembly
   h. hinge cover
   i. WLAN card
   j. WWAN card
   k. hard drive
   l. palm rest
   m. keyboard
   n. keyboard trim
   o. base cover
   p. battery
5. Follow the procedures in After Working Inside Your computer.
Topics:

- Boot Sequence
- Navigation Keys
- System Setup Options
- Updating the BIOS
- System and Setup Password

**Boot Sequence**

Boot Sequence allows you to bypass the System Setup-defined boot device order and boot directly to a specific device (for example: optical drive or hard drive). During the Power-on Self Test (POST), when the Dell logo appears, you can:

- Access System Setup by pressing <F2> key
- Bring up the one-time boot menu by pressing <F12> key

The one-time boot menu displays the devices that you can boot from including the diagnostic option. The boot-menu options are:

- Removable Drive (if available)
- STXXXX Drive
  
  **NOTE:** XXX denotes the SATA drive number.

- Optical Drive
- Diagnostics
  
  **NOTE:** Choosing Diagnostics, will display the ePSA diagnostics screen.

The boot sequence screen also displays the option to access the System Setup screen.

**Navigation Keys**

The following table displays the system setup navigation keys.

**NOTE:** For most of the system setup options, changes that you make are recorded but do not take effect until you re-start the system.

<table>
<thead>
<tr>
<th>Keys</th>
<th>Navigation</th>
</tr>
</thead>
<tbody>
<tr>
<td>Up arrow</td>
<td>Moves to the previous field.</td>
</tr>
<tr>
<td>Down arrow</td>
<td>Moves to the next field.</td>
</tr>
<tr>
<td>&lt;Enter&gt;</td>
<td>Allows you to select a value in the selected field (if applicable) or follow the link in the field.</td>
</tr>
<tr>
<td>Spacebar</td>
<td>Expands or collapses a drop-down list, if applicable.</td>
</tr>
<tr>
<td>&lt;Tab&gt;</td>
<td>Moves to the next focus area.</td>
</tr>
</tbody>
</table>
### System Setup Options

**NOTE:** Depending on your computer and its installed devices, the items listed in this section may or may not appear.

<table>
<thead>
<tr>
<th>Table 3. General</th>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>System Information</td>
<td>This section lists the primary hardware features of your computer.</td>
</tr>
<tr>
<td></td>
<td>• System Information: Displays BIOS Version, Service Tag, Asset Tag, Ownership Tag, Ownership Date, Manufacture Date, and the Express Service Code.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>• Memory Information: Displays Memory Installed, Memory Available, Memory Speed, Memory Channels Mode, Memory Technology, DIMM ASIZE, DIMM B Size,</td>
<td></td>
</tr>
<tr>
<td></td>
<td>• Processor Information: Displays Processor Type, Core Count, Processor ID, Current Clock Speed, Minimum Clock Speed, Maximum Clock Speed, Processor L2 Cache, Processor L3 Cache, HT Capable, and 64-Bit Technology.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>• Device Information: Displays Primary Hard Drive, System eSATA Device, Dock eSATA Device, LOM MAC Address, Video Controller, Video BIOS Version, Video Memory, Panel Type, Native Resolution, Audio Controller, Modem Controller, Wi-Fi Device, WiGig Device, Cellular Device, Bluetooth Device.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Battery Information</td>
<td>Displays the battery status and the type of AC adapter connected to the computer</td>
</tr>
<tr>
<td></td>
<td>Boot Sequence</td>
<td>Allows you to change the order in which the computer attempts to find an operating system.</td>
</tr>
</tbody>
</table>
• Diskette Drive
• Internal HDD
• USB Storage Device
• CD/DVD/CD-RW Drive
• Onboard NIC

Advance Boot Option

This option is required for Legacy boot mode. This option is not allowed if Secure Boot is enabled.

- ** Enable Legacy Option ROMs ** — This option is disabled by default.

Date/Time

Allows you to set the date and time.

**Table 4. System Configuration**

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Integrated NIC</td>
<td>Allows you to configure the integrated network controller. The options are:</td>
</tr>
<tr>
<td></td>
<td>• Disabled</td>
</tr>
<tr>
<td></td>
<td>• Enabled</td>
</tr>
<tr>
<td></td>
<td>• ** Enabled w/PXE:** This option is enabled by default.</td>
</tr>
<tr>
<td></td>
<td>• Enable UEFI Network Stack: This allows you to enable UEFI Networking Protocols in pre-OS and early OS networking environment.</td>
</tr>
<tr>
<td>Parallel Port</td>
<td>Allows you to define and set how the parallel port on the docking station operates. You can set the parallel port to:</td>
</tr>
<tr>
<td></td>
<td>• Disabled</td>
</tr>
<tr>
<td></td>
<td>• ** AT **</td>
</tr>
<tr>
<td></td>
<td>• PS2</td>
</tr>
<tr>
<td></td>
<td>• ECP</td>
</tr>
<tr>
<td>Serial Port</td>
<td>Identifies and defines the serial port settings. You can set the serial port to:</td>
</tr>
<tr>
<td></td>
<td>• Disabled</td>
</tr>
<tr>
<td></td>
<td>• ** COM1 ** (Default Setting)</td>
</tr>
<tr>
<td></td>
<td>• COM2</td>
</tr>
<tr>
<td></td>
<td>• COM3</td>
</tr>
<tr>
<td></td>
<td>• COM4</td>
</tr>
</tbody>
</table>

**NOTE:** The operating system may allocate resources even if the setting is disabled.
SATA Operation

Allows you to configure the internal SATA hard-drive controller. The options are:

- Disabled
- AHCI
- RAID On (Default Setting)

**NOTE:** SATA is configured to support RAID mode.

Drives

Allows you to configure the SATA drives on board. The options are:

- SATA-0
- SATA-1
- SATA-2
- SATA-3

Default Setting: All drives are enabled.

SMART Reporting

This field controls if the hard-drive errors for the integrated drives are reported during system startup. This technology is part of the SMART (Self Monitoring Analysis and Reporting Technology) specification.

- **Enable SMART Reporting**
  - This option is disabled by default.

USB Configuration

Allows you to define the USB configuration. The options are:

- Enable Boot Support
- Enable External USB Port
- Enable USB3.0 Controller

Default Setting: All the options are enabled.

USB PowerShare

Allows you to configure the behavior of the USB PowerShare feature. The option is disabled by default.

- Enable USB PowerShare

Audio

Allows you to enable or disable the integrated audio controller.

- **Enable Audio**—This option is enabled by default.

Unobtrusive Mode

Allows you to set the mode that will turn off all light and sound
emissions from the system. The option is disabled by default.

- Enable Unobtrusive Mode

Miscellaneous Devices

Allows you enable or disable the various on board devices. The options are:

- Enable Microphone
- Enable Hard Drive Free Fall Protection
- Enable Camera
- Enable Media Card
- Disable Media Card

Default Setting: All devices are enabled

Table 5. Video

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>LCD Brightness</td>
<td>Allows you to set the display brightness depending up on the power source (On Battery and On AC).</td>
</tr>
</tbody>
</table>

Table 6. Security

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Admin Password</td>
<td>This field lets you set, change, or delete the administrator (admin) password (sometimes called the setup password). The admin password enables several security features.</td>
</tr>
<tr>
<td></td>
<td>- Enter the old password</td>
</tr>
<tr>
<td></td>
<td>- Enter the new password</td>
</tr>
<tr>
<td></td>
<td>- Confirm the new password</td>
</tr>
<tr>
<td>Default Setting: Not set</td>
<td></td>
</tr>
</tbody>
</table>

System Password

Allows you to set, change, or delete the system password.

- Enter the old password
- Enter the new password
- Confirm the new password

Default Setting: Not set

Internal HDD-1 Password

Allows you to set, change, or delete the administrator password. The drive does not have a password set by default.

- Enter the old password
- Enter the new password
- Confirm the new password

Default Setting: Not set

Strong Password

Allows you to enforce the option to always set strong passwords.
<table>
<thead>
<tr>
<th><strong>Option</strong></th>
<th><strong>Description</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Password Configuration</strong></td>
<td>You can define the length of your password. Min = 4, Max = 32</td>
</tr>
<tr>

</tr>
</tbody>
</table>

**Table 7. Secure Boot**

| **Secure Boot Enable**            | Allows you to enable or disable Secure Boot feature                                             |
|                                   | - Disabled                                                                                      |
|                                   | - **Enabled** (Default Setting)                                                                 |
|                                   | **NOTE:** To enable the Secure Boot, system needs to be UEFI boot mode and enable legacy option ROMs must be turned off.                      |
| **Expert key Management**         | Allows you to manipulate the security key databases only if the system is in Custom Mode. The Enable Custom Mode option is disabled by default. The options are: |
|                                   | - **PK**                                                                                       |
|                                   | - **KEK**                                                                                      |
If you enable the Custom Mode, the relevant options for PK, KEK, db, and dbx appear. The options are:

- Save to File- Saves the key to a user-selected file
- Replace from File- Replaces the current key with a key from a user-selected file
- Append from File- Adds a key to the current database from a user-selected file
- Delete- Deletes the selected key
- Reset All Keys- Resets to default setting
- Delete All Keys- Deletes all the keys

**NOTE:** If you disable the Custom Mode, all the changes made will be erased and the keys will restore to default settings.

### Table 8. Performance

<td>- Wake on AC</td>
</tr>
<tr>
<td>Auto On Time</td>
<td>Allows you to set the time at which the computer must turn on automatically. The options are:</td>
</tr>
<tr>
<td></td>
<td>- <strong>Disabled</strong> (Default Setting)</td>
</tr>
<tr>
<td></td>
<td>- Every Day</td>
</tr>
<tr>
<td></td>
<td>- Weekdays</td>
</tr>
<tr>
<td>Option</td>
<td>Description</td>
</tr>
<tr>
<td>------------------------------</td>
<td>-----------------------------------------------------------------------------</td>
</tr>
<tr>
<td>USB Wake Support</td>
<td>Allows you to enable the USB devices to wake the computer from standby mode. The option is disabled</td>
</tr>
<tr>
<td></td>
<td>• Enable USB Wake Support</td>
</tr>
<tr>
<td>Wireless Radio Control</td>
<td>Allows you to control the WLAN and WWAN radio. The options are:</td>
</tr>
<tr>
<td></td>
<td>• Control WLAN radio</td>
</tr>
<tr>
<td></td>
<td>• Control WWAN radio</td>
</tr>
<tr>
<td>Default Setting: Both the options are disabled.</td>
<td></td>
</tr>
<tr>
<td>Wake on LAN/WLAN</td>
<td>This option allows the computer to power up from the off state when triggered by a special LAN signal. Wake-up from the Standby state is unaffected by this setting and must be enabled in the operating system. This feature only works when the computer is connected to AC power supply.</td>
</tr>
<tr>
<td></td>
<td>• Disabled - Does not allow the system to power on by special LAN signals when it receives a wake-up signal from the LAN or wireless LAN. (Default Setting)</td>
</tr>
<tr>
<td></td>
<td>• LAN Only - Allows the system to be powered on by special LAN signals.</td>
</tr>
<tr>
<td></td>
<td>• WLAN Only</td>
</tr>
<tr>
<td></td>
<td>• LAN or WLAN</td>
</tr>
<tr>
<td>Block Sleep</td>
<td>Allows you to block the computer from entering into the sleep state. Option is disabled by default.</td>
</tr>
<tr>
<td></td>
<td>• Block Sleep (S3)</td>
</tr>
<tr>
<td>Peak Shift</td>
<td>Peak Shift can be used to minimize AC consumption during peak powers times of day. Set the start and end time to run in Peak Shift mode.</td>
</tr>
<tr>
<td></td>
<td>• Enable Peak Shift (Disabled)</td>
</tr>
<tr>
<td>Advanced Battery Charge</td>
<td>Allows batteries in the system in Advanced Battery Charge Mode to maximize battery health. This uses standard charging algorithm and other techniques during non-work hours to maximize battery health</td>
</tr>
<tr>
<td>Configuration</td>
<td>• Enable Advanced Battery Charge Mode (Disabled)</td>
</tr>
<tr>
<td>Primary Battery Configuration</td>
<td>Allows you to define how to use the battery charge, when AC is plugged in. The options are:</td>
</tr>
<tr>
<td></td>
<td>• Adaptive (Enabled)</td>
</tr>
<tr>
<td></td>
<td>• Standard Charge</td>
</tr>
<tr>
<td></td>
<td>• Express Charge</td>
</tr>
<tr>
<td></td>
<td>• Primary AC Use</td>
</tr>
<tr>
<td></td>
<td>• Custom Charge — you can set the percentage to which the battery must charge.</td>
</tr>
<tr>
<td>Intel Smart Connect Technology</td>
<td>The option is disabled by default. If option enables will periodically sense nearby wireless connection while the system is asleep. It will synchronize emails or social media application that were open when system entered the sleep state.</td>
</tr>
<tr>
<td></td>
<td>• Smart Connection (Disabled)</td>
</tr>
</tbody>
</table>

Table 10. POST Behavior

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Adapter Warnings</td>
<td>Allows you to activate the adapter warning messages when certain power adapters are used. The option is enabled by default.</td>
</tr>
</tbody>
</table>
### Option | Description
---|---
**Keypad (Embedded)** | Allows you to enable the keypad to embed in the internal keyboard.
  - Enable Adapter Warnings
  - Fn Key Only
  - By Numlock
  **NOTE:** When setup is running, this option has no effect, Setup works in the “Fn Key Only” mode.

**Mouse/Touchpad** | Allows you to define how the computer handles the mouse and touchpad input. The options are:
  - Serial Mouse
  - PS2 Mouse
  - **Touchpad/PS-2 Mouse** (Default Setting)

**Numlock Enable** | Specifies if the NumLock function can be enabled when the computer boots. This option is enabled by default.
  - Enable Numlock

**Fn Key Emulation** | Allows you to match the <Scroll Lock> key feature of PS-2 keyboard with the <Fn> key feature in an internal keyboard. The option is enabled by default.
  - Enable Fn Key Emulation

**Fn Lock Option** | Allows you to hot keys combination toggle the primary behavior. The option are:
  - Fn Lock
  - Lock Mode Disable/Standard
  - Lock Mode Enable/Secondary

**MEBx Hotkey** | Allows you to specify whether the MEBx Hotkey function should be enabled when the system boots. The option is enabled by default.

**Fastboot** | Allows you to speed up the boot process by by-passing some compatibility steps.
  - Minimal
  - Thorough
  - Auto

**Extended BIOS POST Time** | Allows to creates an additional pre-boot delay and allows the user to see POST status message.
  - 0 seconds
  - 5 seconds
  - 10 seconds

### Table 11. Virtualization Support

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Virtualization</td>
<td>Allows you to enable or disable the Intel Virtualization Technology. Default Setting: Enable Intel Virtualization Technology</td>
</tr>
<tr>
<td>VT for Direct I/O</td>
<td>Enables or disables the Virtual Machine Monitor (VMM) from utilizing the additional hardware capabilities provided by Intel® Virtualization technology for direct I/O. Enable VT for Direct I/O — This option is enabled by default.</td>
</tr>
</tbody>
</table>
Option | Description
---|---
Trusted Execution | This option specifies whether a Measured Virtual Machine Monitor (MVMM) can utilize the additional hardware capabilities provided by Intel Trusted Execution Technology. The TPM virtualization Technology, and Virtualization technology for direct I/O must be enabled to use this feature.

Trusted Execution — disabled by default.

**Table 12. Wireless**

<table>
<thead>

| **Power Events** | Displays the power event log and allows you to clear the log.  
  - Clear Log |
Updating the BIOS

It is recommended to update your BIOS (system setup), on replacing the system board or if an update is available. For laptops, ensure that your computer battery is fully charged and connected to a power outlet.

1. Re-start the computer.
2. Go to dell.com/support.
3. Enter the Service Tag or Express Service Code and click Submit.

   - **NOTE:** To locate the Service Tag, click Where is my Service Tag?
   - **NOTE:** If you cannot find your Service Tag, click Detect My Product. Proceed with the instructions on screen.

4. If you are unable to locate or find the Service Tag, click the Product Category of your computer.
5. Choose the Product Type from the list.
6. Select your computer model and the Product Support page of your computer appears.
7. Click Get drivers and click View All Drivers.
   The Drivers and Downloads page opens.
8. On the Drivers and Downloads screen, under the Operating System drop-down list, select BIOS.
9. Identify the latest BIOS file and click Download File.
   You can also analyze which drivers need an update. To do this for your product, click Analyze System for Updates and follow the instructions on the screen.
10. Select your preferred download method in the Please select your download method below window, click Download File.
   The File Download window appears.
11. Click Save to save the file on your computer.
12. Click Run to install the updated BIOS settings on your computer.
   Follow the instructions on the screen.

System and Setup Password

You can create a system password and a setup password to secure your computer.

<table>
<thead>
<tr>
<th>Password Type</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>System password</td>
<td>Password that you must enter to log on to your system.</td>
</tr>
<tr>
<td>Setup password</td>
<td>Password that you must enter to access and make changes to the BIOS settings of your computer.</td>
</tr>
</tbody>
</table>

⚠️ **CAUTION:** The password features provide a basic level of security for the data on your computer.

⚠️ **CAUTION:** Anyone can access the data stored on your computer if it is not locked and left unattended.

⚠️ **NOTE:** Your computer is shipped with the system and setup password feature disabled.

Assigning a System Password and Setup Password

You can assign a new System Password and/or Setup Password or change an existing System Password and/or Setup Password only when Password Status is Unlocked. If the Password Status is Locked, you cannot change the System Password.

⚠️ **NOTE:** If the password jumper is disabled, the existing System Password and Setup Password are deleted and you need not provide the system password to log on to the computer.

To enter a system setup, press <F2> immediately after a power-on or re-boot.

1. In the System BIOS or System Setup screen, select System Security and press <Enter>. 
The System Security screen appears.

2 In the System Security screen, verify that Password Status is Unlocked.

3 Select System Password, enter your system password, and press <Enter> or <Tab>.

Use the following guidelines to assign the system password:

- A password can have up to 32 characters.
- The password can contain the numbers 0 through 9.
- Only lower case letters are valid, upper case letters are not allowed.
- Only the following special characters are allowed: space, (+), (-), (/), (.), (.), ([), (]), (`).

Re-enter the system password when prompted.

4 Type the system password that you entered earlier and click OK.

5 Select Setup Password, type your system password and press <Enter> or <Tab>.

A message prompts you to re-type the setup password.

6 Type the setup password that you entered earlier and click OK.
7 Press <Esc> and a message prompts you to save the changes.
8 Press <Y> to save the changes.

The computer reboots.

Deleting or changing an existing system setup password

Ensure that the Password Status is Unlocked (in the System Setup) before attempting to delete or change the existing System and/or Setup password. You cannot delete or change an existing System or Setup password, if the Password Status is Locked.

To enter the System Setup, press F2 immediately after a power-on or reboot.

1 In the System BIOS or System Setup screen, select System Security and press Enter.

The System Security screen is displayed.

2 In the System Security screen, verify that Password Status is Unlocked.

3 Select System Password, alter or delete the existing system password and press Enter or Tab.

4 Select Setup Password, alter or delete the existing setup password and press Enter or Tab.

⚠️ NOTE: If you change the System and/or Setup password, re-enter the new password when promoted. If you delete the System and/or Setup password, confirm the deletion when promoted.

5 Press Esc and a message prompts you to save the changes.
6 Press Y to save the changes and exit from System Setup.

The computer reboots.
If you experience a problem with your computer, run the ePSA diagnostics before contacting Dell for technical assistance. The purpose of running diagnostics is to test your computer's hardware without requiring additional equipment or risking data loss. If you are unable to fix the problem yourself, service and support personnel can use the diagnostics results to help you solve the problem.

Topics:
- Enhanced Pre-Boot System Assessment — ePSA diagnostics
- Device Status Lights
- Battery Status Lights

### Enhanced Pre-Boot System Assessment — ePSA diagnostics

The ePSA diagnostics (also known as system diagnostics) performs a complete check of your hardware. The ePSA is embedded with the BIOS and is launched by the BIOS internally. The embedded system diagnostics provides a set of options for particular devices or device groups allowing you to:

- Run tests automatically or in an interactive mode
- Repeat tests
- Display or save test results
- Run thorough tests to introduce additional test options to provide extra information about the failed device(s)
- View status messages that inform you if tests are completed successfully
- View error messages that inform you of problems encountered during testing

⚠️ **CAUTION:** Use the system diagnostics to test only your computer. Using this program with other computers may cause invalid results or error messages.

⚠️ **NOTE:** Some tests for specific devices require user interaction. Always ensure that you are present at the computer terminal when the diagnostic tests are performed.

### Device Status Lights

#### Table 15. Device Status Lights

<table>
<thead>
<tr>
<th>Icon</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="icon" alt="Power" /></td>
<td>Turns on when you turn on the computer and blinks when the computer is in a power management mode.</td>
</tr>
<tr>
<td><img src="icon" alt="Read/Write" /></td>
<td>Turns on when the computer reads or writes data.</td>
</tr>
<tr>
<td><img src="icon" alt="Battery Charge" /></td>
<td>Turns on steadily or blinks to indicate battery charge status.</td>
</tr>
<tr>
<td><img src="icon" alt="Wireless Networking" /></td>
<td>Turns on when wireless networking is enabled.</td>
</tr>
</tbody>
</table>

The device status LEDs are usually located either on the top or left side of the keyboard. They display the storage, battery and wireless devices connectivity and activity. Apart from that they can be useful as a diagnostic tool when there's a possible failure to the system.
The following table lists how to read the LED codes when possible errors occur.

**Table 16. LED Lights**

</tbody>
</table>

**Battery Status Lights**

If the computer is connected to an electrical outlet, the battery light operates as follows:

- **Alternately blinking amber light and white light**
  - An unauthenticated or unsupported non-Dell AC adapter is attached to your laptop.

- **Alternately blinking amber light with steady white light**
  - Temporary battery failure with AC adapter present.

- **Constantly blinking amber light**
  - Fatal battery failure with AC adapter present.

- **Light off**
  - Battery in full charge mode with AC adapter present.

- **White light on**
  - Battery in charge mode with AC adapter present.
NOTE: Offerings may vary by region. The following specifications are only those required by law to ship with your computer. For more information about the configuration of your computer, go to Help and Support in your Windows operating system and select the option to view information about your computer.
