Dell Precision M2800
Owner's Manual
Notes, Cautions, and Warnings

NOTE: A NOTE indicates important information that helps you make better use of your computer.

CAUTION: A CAUTION indicates either potential damage to hardware or loss of data and tells you how to avoid the problem.

WARNING: A WARNING indicates a potential for property damage, personal injury, or death.

Working on Your Computer

Before Working Inside Your Computer

Use the following safety guidelines to help protect your computer from potential damage and to help to ensure your personal safety. Unless otherwise noted, each procedure included in this document assumes that the following conditions exist:

- You have read the safety information that shipped with your computer.
- A component can be replaced or—if purchased separately—installed by performing the removal procedure in reverse order.

⚠️ WARNING: Disconnect all power sources before opening the computer cover or panels. After you finish working inside the computer, replace all covers, panels, and screws before connecting to the power source.

⚠️ WARNING: Before working inside your computer, read the safety information that shipped with your computer. For additional safety best practices information, see the Regulatory Compliance Homepage at www.dell.com/regulatory_compliance

⚠️ CAUTION: Many repairs may only be done by a certified service technician. You should only perform troubleshooting and simple repairs as authorized in your product documentation, or as directed by the online or telephone service and support team. Damage due to servicing that is not authorized by Dell is not covered by your warranty. Read and follow the safety instructions that came with the product.

⚠️ CAUTION: To avoid electrostatic discharge, ground yourself by using a wrist grounding strap or by periodically touching an unpainted metal surface, such as a connector on the back of the computer.

⚠️ CAUTION: Handle components and cards with care. Do not touch the components or contacts on a card. Hold a card by its edges or by its metal mounting bracket. Hold a component such as a processor by its edges, not by its pins.

⚠️ CAUTION: When you disconnect a cable, pull on its connector or on its pull-tab, not on the cable itself. Some cables have connectors with locking tabs; if you are disconnecting this type of cable, press in on the locking tabs before you disconnect the cable. As you pull connectors apart, keep them evenly aligned to avoid bending any connector pins. Also, before you connect a cable, ensure that both connectors are correctly oriented and aligned.

⚠️ NOTE: The color of your computer and certain components may appear differently than shown in this document.

To avoid damaging your computer, perform the following steps before you begin working inside the computer.

1. Ensure that your work surface is flat and clean to prevent the computer cover from being scratched.
2. Turn off your computer (see Turning off Your Computer).
3. If the computer is connected to a docking device (docked), undock it.

   ![CAUTION: To disconnect a network cable, first unplug the cable from your computer and then unplug the cable from the network device.]

4. Disconnect all network cables from the computer.
5. Disconnect your computer and all attached devices from their electrical outlets.
6. Close the display and turn the computer upside-down on a flat work surface.

   ![NOTE: To avoid damaging the system board, you must remove the main battery before you service the computer.]

7. Remove the main battery.
8. Turn the computer top-side up.
9. Open the display.
10. Press the power button to ground the system board.

   ![CAUTION: To guard against electrical shock, always unplug your computer from the electrical outlet before opening the display.]

   ![CAUTION: Before touching anything inside your computer, ground yourself by touching an unpainted metal surface, such as the metal at the back of the computer. While you work, periodically touch an unpainted metal surface to dissipate static electricity, which could harm internal components.]

11. Remove any installed ExpressCards or Smart Cards from the appropriate slots.

### Turning Off Your Computer

![CAUTION: To avoid losing data, save and close all open files and exit all open programs before you turn off your computer.]

1. Shut down the operating system:
   - In Windows 8:
     - Using a touch-enabled device:
       a. Swipe in from the right edge of the screen, opening the Charms menu and select **Settings**.
       b. Select the ![power icon](power_icon.png) and then select **Shut down**
     - Using a mouse:
       a. Point to upper-right corner of the screen and click **Settings**.
       b. Click the ![power icon](power_icon.png) and select **Shut down**.
   - In Windows 7:
     1. Click ![Start button](start_button.png)
     2. Click **Shut Down**.

     or

     1. Click ![Start button](start_button.png)
2. Click the arrow in the lower-right corner of the Start menu as shown below, and then click Shut Down.

2. Ensure that the computer and all attached devices are turned off. If your computer and attached devices did not automatically turn off when you shut down your operating system, press and hold the power button for about 4 seconds to turn them off.

After Working Inside Your Computer

After you complete any replacement procedure, ensure you connect any external devices, cards, and cables before turning on your computer.

⚠️ CAUTION: To avoid damage to the computer, use only the battery designed for this particular Dell computer. Do not use batteries designed for other Dell computers.

1. Connect any external devices, such as a port replicator or media base, and replace any cards, such as an ExpressCard.
2. Connect any telephone or network cables to your computer.

⚠️ CAUTION: To connect a network cable, first plug the cable into the network device and then plug it into the computer.

3. Replace the battery.
4. Connect your computer and all attached devices to their electrical outlets.
5. Turn on your computer.
Removing and Installing Components

This section provides detailed information on how to remove or install the components from your computer.

Recommended Tools

The procedures in this document may require the following tools:

- Small flat-blade screwdriver
- Phillips screwdriver
- Small plastic scribe

System Overview

![Figure 1. Back View — Back Cover Removed](image)

1. heat-sink assembly
2. hard drive
3. memory
4. SD card slot
### Removing the Secure Digital (SD) Card

1. Follow the procedures in [Before Working Inside your computer](#).
2. Press in on the SD card to release it from the computer. Slide the SD card out of the computer.
Installing the Secure Digital (SD) Card

1. Slide the SD card into its slot until it clicks into place.
2. Follow the procedures in After Working Inside Your Computer.

Removing the ExpressCard

1. Follow the procedures in Before Working Inside Your Computer.
2. Press in on the ExpressCard to release it from the computer. Slide the ExpressCard out of the computer.

Installing the ExpressCard

1. Slide the ExpressCard in its slot until it clicks in place.
2. Follow the procedures in After Working Inside Your Computer

Removing the Battery

1. Follow the procedures in Before Working Inside your computer.
2. Slide the release latches to unlock the battery.
3. Flip the battery out of the computer.
Installing the Battery

1. Slide the battery into its slot until it clicks into place.
2. Follow the procedures in After Working Inside Your Computer.

Removing the Base Cover

1. Follow the procedures in Before Working Inside your computer.
2. Remove the screws that secure the base cover to the computer.
3. Lift the base cover and remove it from the computer.
Installing the Base Cover

1. Place the base cover to align with the screw holes on the computer.
2. Tighten the screws to secure the base cover to the computer.
3. Install the battery.
4. Follow the procedures in After Working Inside Your Computer.

Removing the Base-Corner Covers

1. Follow the procedures in Before Working Inside your computer.
2. Remove the battery.
3. Remove the base cover.
4. Remove the screws that secure the left base-corner cover, lift and remove it from the computer.
5. Remove the screws that secure the right base-corner cover, lift and remove it from the computer.

Installing the Base-Corner Covers

1. Place the left and right base-corner covers to align with the screw holes on the computer.
2. Tighten the screws to secure the base-corner covers to the computer.
3. Install:
   a. **base cover**
   b. **battery**
4. Follow the procedures in *After Working Inside Your Computer*.

Removing the Memory

1. Follow the procedures in *Before Working Inside Your Computer*.
2. Remove:
   a. **battery**
   b. **base cover**
3. Pry the securing clips away from the memory module until it pops-up and remove the memory module from its connector on the system board.

![Memory Module Removal](image)

**Installing the Memory**

1. Insert the memory into the memory socket.
2. Press the securing clips to secure the memory module to the system board.
3. Install:
   a. base cover
   b. battery
4. Follow the procedures in *After Working Inside Your Computer*.

**Removing the Hard Drive**

1. Follow the procedures in *Before Working Inside Your Computer*.
2. Remove the battery.
3. Remove the screws that secure the hard drive to the computer. Slide the hard drive out of the computer.
4. Remove the screw that secures the hard-drive caddy to the hard drive. Remove the hard-drive caddy from the hard drive.
Installing the Hard Drive

1. Install the hard-drive isolation on the hard drive.
2. Attach the hard-drive caddy to the hard drive.
3. Tighten the screws to secure the hard-drive caddy to the hard drive.
4. Slide the hard drive into the computer.
5. Tighten the screws to secure the hard drive to the computer.
6. Install the battery.
7. Follow the procedures in After Working Inside Your Computer.

Removing the Optical Drive

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove the battery.
3. Press the optical-drive latch to release the optical drive and pull the optical drive from the computer.
4. Remove the screw that secures the optical-drive latch to the optical drive. Slide the optical-drive latch and remove it from the optical-drive.

5. Remove the screws that secure the optical-drive latch bracket to the optical drive. Remove the latch bracket from the optical drive.

Installing the Optical Drive

1. Align the optical-drive latch bracket to its position on the optical drive.
2. Tighten the screw to secure the optical-drive latch bracket to the optical drive.
3. Slide the optical-drive latch in the optical-drive latch bracket.
4. Tighten the screws to secure the optical-drive latch to the optical-drive latch bracket.
5. Slide the optical drive into the drive bay.
6. Press the optical-drive latch to secure the optical drive.
7. Install the battery.
8. Follow the procedures in After Working Inside Your Computer.

Removing the Wireless Local Area Network (WLAN) Card

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove:
   a. battery
   b. base cover
3. Disconnect the antenna cables, remove the screw that secures the WLAN card to the computer, and lift the WLAN card from the computer.

Installing the WLAN Card

1. Insert the WLAN card in its connector at a 45-degree angle in its slot.
2. Tighten the screw to secure the WLAN card to the computer.
3. Connect the antenna cables to their respective connectors marked on the WLAN card.
4. Install:
   a. base cover
   b. battery
5. Follow the procedures in After Working Inside Your Computer.

Removing the Wireless Wide Area Network (WWAN) Card

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove:
   a. battery
   b. base cover
3. Perform the following steps as shown in the illustration:
   a. Disconnect the antenna cables from the WWAN card.
   b. Remove the screw that secures the WWAN card to the computer.
   c. Remove the WWAN card from the computer.
Installing the WWAN Card

1. Place the WWAN card in its slot in the system board.
2. Press the WWAN card down and tighten the screw to secure the WWAN card to the computer.
3. Connect the antenna cables to their connectors on the WWAN card.
4. Install:
   a. base cover
   b. battery
5. Follow the procedures in After Working Inside Your Computer.

Removing the Network Connector

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove:
   a. battery
   b. base cover
   c. base-corner cover (left)
3. Perform the following steps as shown in the illustration:
   a. Disconnect the cable from the system board.
   b. Release cable from the routing channel.
   c. Remove the screw that secures the network-connector bracket to the computer.
4. Lift the network-connector bracket from the computer. Lift the network connector from the computer.
Installing the Network Connector

1. Align the network connector to its position on the computer.
2. Place the network-connector bracket on the network connector.
3. Tighten the screw to secure the network-connector bracket to the computer.
4. Route the cable through the routing channel.
5. Connect the cable to the system board.
6. Install:
   a. base-corner cover (left)
   b. base cover
   c. battery
7. Follow the procedures in After Working Inside Your Computer.

Removing the Coin-Cell Battery

1. Follow the procedures in Before Working Inside your computer.
2. Remove:
   a. battery
   b. base cover
3. Disconnect the coin-cell battery cable, pry the coin-cell battery upward, and remove the coin-cell from the computer.
Installing the Coin-Cell Battery

1. Place the coin-cell battery in its slot.
2. Connect the coin-cell battery cable to the system board.
3. Install:
   a. base cover
   b. battery
4. Follow the procedures in After Working Inside Your Computer.

Removing the Power Connector

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove:
   a. battery
   b. base-corner cover (right)
   c. base cover
3. Perform the following steps as shown in the illustration:
   a. Disconnect the power-connector cable from the system board.
   b. Release the power-connector cable from the routing channel.
   c. Remove the screw that secures the power-connector bracket to the computer.
4. Lift the power-connector bracket from the computer. Lift the power connector from the computer.
Installing the Power Connector

1. Align the power connector to its position in the computer.
2. Place the power-connector bracket on the power connector.
3. Tighten the screw to secure the power-connector bracket to the computer.
4. Route the cable through the routing channel.
5. Connect the cable to the system board.
6. Install:
   a. base cover
   b. base-corner cover (right)
   c. battery
7. Follow the procedures in After Working Inside Your Computer.

Removing the Heat-Sink Assembly

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove:
   a. battery
   b. base cover
3. Disconnect the fan cable and remove the screws that secure the heat-sink assembly to the system board.
4. Perform the following steps as shown in the illustration:
   a. Slide the heat-sink assembly.
   b. Lift the heat-sink assembly from the computer.

Installing the Heat-Sink Assembly

1. Slide the heat-sink assembly to its position on the system board.
2. Tighten the screws to secure the heat-sink assembly to the system board.
3. Connect the fan cable to the system board.
4. Install:
   a. base cover
   b. battery
5. Follow the procedures in After Working Inside Your Computer.

Removing the Processor

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove:
   a. battery
   b. base cover
   c. heatsink
3. Rotate the processor-cam lock in a counter-clockwise direction. Remove the processor from the computer.
Installing the Processor

1. Align the notches on the processor and the socket, and insert the processor into the socket.
2. Rotate the processor-cam lock in a clockwise direction.
3. Install:
   a. heatsink
   b. base cover
   c. battery
4. Follow the procedures in After Working Inside Your Computer.

Removing the Keyboard

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove the battery.
3. Pry the keyboard trim from its edges and remove the keyboard trim from the computer.
4. Remove the screws that secure the keyboard to the palmrest assembly.
5. Flip the keyboard and disconnect the keyboard cable from the system board.

Installing the Keyboard

1. Connect the keyboard cable to the system board.
2. Place the keyboard to align with the screw holders on the computer.
3. Tighten the screws to secure the keyboard to the palmrest assembly.
4. Insert the keyboard trim on the keyboard and press along the sides until it snaps in place.
5. Install the battery.
6. Follow the procedures in After Working Inside Your Computer.

Removing the Palmrest Assembly

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove:
   a. SD card
   b. ExpressCard
   c. battery
   d. keyboard
   e. display-hinge cap
3. Remove the screws that secure the palmrest assembly to the base of the computer.

4. Flip the computer and remove the screws that secure the palmrest assembly to the computer.
5. Disconnect the following cables:
   a. fingerprint-reader
   b. touchpad
   c. power-button
6. Pry the palmrest assembly upwards and remove it from the computer.
Installing the Palmrest Assembly

1. Align the palmrest assembly to its original position in the computer and snap it into place.
2. Tighten the screws to secure the palmrest assembly to the computer.
3. Connect the following cables:
   a. power-button
   b. touchpad
   c. fingerprint-reader
4. Flip the computer and tighten the screws to secure the palmrest assembly to the base of the computer.
5. Install:
   a. base-corner covers
   b. base cover
   c. display-hinge cap
   d. keyboard
   e. battery
   f. ExpressCard
   g. SD card
6. Follow the procedures in After Working Inside Your Computer.
Removing the WiFi-Switch Board

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove:
   a. SD card
   b. ExpressCard
   c. battery
   d. keyboard
   e. display-hinge cap
   f. base cover
   g. base-corner covers
   h. palmrest assembly
3. Perform the following steps as shown in the illustration:
   a. Disconnect the cable from the system board.
   b. Remove the screw that secures the WiFi-switch board and lift it from the computer.

Installing the WiFi-Switch Board

1. Place the WiFi-switch board in its slot.
2. Tighten the screw to secure the WiFi-switch board to the computer.
3. Connect the cable to the system board.
4. Install:
   a. palmrest assembly
   b. base cover
   c. base-corner covers
   d. display-hinge cap
   e. keyboard
   f. battery
   g. ExpressCard
   h. SD card
5. Follow the procedures in After Working Inside Your Computer.
Removing the VGA Board

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove:
   a. SD card
   b. ExpressCard
   c. battery
   d. keyboard
   e. display-hinge cap
   f. base cover
   g. base-corner covers
   h. palmrest assembly
3. Remove the screws that secure the VGA board to the computer and remove it from its connector.

Installing the VGA Board

1. Insert the VGA board in its slot
2. Tighten the screws to secure the VGA board to the computer.
3. Install:
   a. palmrest assembly
   b. base-corner covers
   c. base cover
   d. display-hinge cap
   e. keyboard
   f. battery
   g. ExpressCard
   h. SD card
4. Follow the procedures in After Working Inside Your Computer.

Removing the ExpressCard Cage

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove:
   a. SD card
b. ExpressCard

c. battery

d. keyboard

e. display-hinge cap

f. base cover

g. base-corner covers

h. Palmrest Assembly

3. Remove the screws that secure the ExpressCard cage to the computer. Remove the ExpressCard cage from the computer.

Installing the ExpressCard Cage

1. Place the ExpressCard cage in its slot.
2. Tighten the screws to secure the ExpressCard cage to the computer.
3. Install:
   a. palmrest assembly
   b. base-corner covers
   c. base cover
   d. display-hinge cap
   e. keyboard
   f. battery
   g. ExpressCard
   h. SD card

4. Follow the procedures in After Working Inside Your Computer.

Removing the System Board

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove:
   a. SD card
   b. ExpressCard
   c. battery
   d. keyboard
   e. hard drive
   f. optical drive
Perform the following steps as shown in the illustration:

a. Disconnect the WiFi-switch from the system board.

b. Disconnect the speaker cables from the system board.

4. Remove the screws that secure the system board to the computer.
5. Lift the system board from the computer.
Installing the System Board

1. Place the system board to align with the ports on the computer.
2. Tighten the screws to secure the system board.
3. Connect the following cables to the system board:
   a. speaker
   b. WiFi-switch
4. Install:
   a. ExpressCard cage
   b. VGA board
   c. processor
   d. heatsink
   e. WWAN card
   f. WLAN card
   g. memory
   h. coin-cell battery
   i. power connector
   j. base-corner covers
   k. base cover
   l. display-hinge cap
   m. optical drive
5. Follow the procedures in *After Working Inside Your Computer*.

### Removing the Speakers

1. Follow the procedures in *Before Working Inside Your Computer*.
2. Remove:
   a. **SD card**
   b. **ExpressCard**
   c. **battery**
   d. **keyboard**
   e. **hard drive**
   f. **optical drive**
   g. **display-hinge cap**
   h. **base cover**
   i. **base-corner covers**
   j. **palmrest assembly**
   k. **power connector**
   l. **coin cell**
   m. **memory**
   n. **WLAN card**
   o. **WWAN card**
   p. **heatsink**
   q. **processor**
   r. **VGA board**
   s. **ExpressCard cage**
   t. **system board**

3. Remove the speaker cable from the routing channels. Remove the screws that secure the speakers to the computer.
4. Lift the speakers from the computer.
Installing the Speakers

1. Align the speakers in its position on the computer and route the speaker cable in the routing channels on the computer.
2. Tighten the screws to secure the speakers.
3. Install:
   a. system board
   b. ExpressCard cage
   c. VGA board
   d. processor
   e. heatsink
   f. WWAN card
   g. WLAN card
   h. memory
   i. coin-cell battery
   j. power connector
   k. palmrest assembly
   l. base-corner covers
   m. base cover
   n. display-hinge cap
   o. optical drive
**Removing the Display-Hinge Cap**

1. Follow the procedures in *Before Working Inside Your Computer*.
2. Remove the **battery**.
3. Remove the screws that secure the display-hinge cap to the computer and remove the display-hinge cap from the computer.

**Installing the Display-Hinge Cap**

1. Align the display-hinge cap with the screw holes.
2. Tighten the screws to secure the display-hinge cap to the computer.
3. Install the **battery**.
4. Follow the procedures in *After Working Inside Your Computer*.

**Removing the Display Assembly**

1. Follow the procedures in *Before Working Inside your computer*.
2. Remove:
   a. **battery**
   b. **display-hinge cap**
   c. **base cover**
   d. **base-corner covers**
3. Disconnect the antenna cables connected to the WLAN card and release it from the routing channel. Disconnect the camera cable from the system board.
4. Disconnect the LVDS cable and release the LVDS cable and camera cable from the routing channel. Remove them from the computer.
5. Remove the screws that secure the display assembly to the computer.
6. Remove the display assembly from the computer.
Installing the Display Assembly

1. Place the display assembly in its position on the computer.
2. Tighten the screws to secure the display assembly.
3. Route the LVDS cable and the camera cable through the routing channel.
4. Route the antenna cables through the routing channel.
5. Connect the antenna cables to the WLAN card on the computer.
6. Connect the camera cable to the computer.
7. Install:
   a. base-corner covers
   b. base cover
   c. display-hinge cap
   d. battery
8. Follow the procedures in After Working Inside Your Computer.

Removing the Display Bezel

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove:
   a. battery
b. display-hinge cap

c. base cover

d. base-corner covers

e. display assembly

3. Pry up along the edges to release the display bezel.

4. Remove the display bezel from the display assembly.
Installing the Display Bezel

1. Place the display bezel onto the display assembly.
2. Starting from the top corner, press on the display bezel and work around the entire bezel until it clicks onto the display assembly.
3. Press on the left and right edges of the display bezel.
4. Install:
   a. display assembly
   b. base-corner covers
   c. base cover
   d. display-hinge cap
   e. battery
5. Follow the procedures in After Working Inside Your Computer.

Removing the Display Panel

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove:
   a. battery
   b. display-hinge cap
   c. base cover
   d. base-corner covers
   e. display assembly
f. display bezel

3. Remove the screws that secure the display panel to the display assembly.

4. Flip the display panel over.
5. Peel off the LVDS cable-connector tape and disconnect the LVDS cable from the display panel. Remove the display panel from the display assembly.
Installing the Display Panel

1. Connect the LVDS cable and stick the LVDS cable-connector tape.
2. Flip the display and place it in the display assembly.
3. Tighten the screws to secure the display panel to the display assembly.
4. Install:
   a. display bezel
   b. display assembly
   c. base-corner covers
   d. base cover
   e. display-hinge cap
   f. battery
5. Follow the procedures in After Working Inside Your Computer.

Removing the Display Hinges

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove:
   a. battery
   b. display-hinge cap
   c. base cover
   d. base-corner covers
   e. display assembly
3. Perform the following steps as shown in the illustration:
   a. Remove the screws that secure the display hinges to the display assembly.
   b. Remove the display hinges from the computer.

### Installing the Display Hinges

1. Place the display hinges in its location on the computer.
2. Tighten the screws to secure the display hinges to the display assembly.
3. Install:
   a. display panel
   b. display bezel
   c. display assembly
   d. base-corner covers
   e. base cover
   f. display-hinge cap
   g. battery
4. Follow the procedures in After Working Inside Your Computer.

### Removing the Camera

1. Follow the procedures in Before Working Inside your computer.
2. Remove:
   a. battery
   b. display assembly
   c. display bezel
3. Perform the following steps to remove the camera:
   a. Disconnect the camera cable.
   b. Remove the screw that secures the camera module.
   c. Lift the camera module from the computer.
Installing the Camera

1. Place the camera module in its slot in the computer.
2. Tighten the screw to secure the camera to the display assembly.
3. Connect the camera cable.
4. Install:
   a. display bezel
   b. display assembly
   c. battery
5. Follow the procedures in After Working Inside Your Computer.
System Setup

System Setup enables you to manage your computer hardware and specify BIOS-level options. From the System Setup, you can:

• Change the NVRAM settings after you add or remove hardware
• View the system hardware configuration
• Enable or disable integrated devices
• Set performance and power management thresholds
• Manage your computer security

Boot Sequence

Boot Sequence allows you to bypass the System Setup-defined boot device order and boot directly to a specific device (for example: optical drive or hard drive). During the Power-on Self Test (POST), when the Dell logo appears, you can:

• Access System Setup by pressing <F2> key
• Bring up the one-time boot menu by pressing <F12> key

The one-time boot menu displays the devices that you can boot from including the diagnostic option. The boot-menu options are:

• Removable Drive (if available)
• STXXXX Drive
  
  NOTE: XXX denotes the SATA drive number.
• Optical Drive
• Diagnostics

  NOTE: Choosing Diagnostics, will display the ePSA diagnostics screen.

The boot sequence screen also displays the option to access the System Setup screen.

Navigation Keys

The following table displays the system setup navigation keys.

NOTE: For most of the system setup options, changes that you make are recorded but do not take effect until you re-start the system.
Table 1. Navigation Keys

<table>
<thead>
<tr>
<th>Keys</th>
<th>Navigation</th>
</tr>
</thead>
<tbody>
<tr>
<td>Up arrow</td>
<td>Moves to the previous field.</td>
</tr>
<tr>
<td>Down arrow</td>
<td>Moves to the next field.</td>
</tr>
<tr>
<td>&lt;Enter&gt;</td>
<td>Allows you to select a value in the selected field (if applicable) or follow the link in the field.</td>
</tr>
<tr>
<td>Spacebar</td>
<td>Expands or collapses a drop-down list, if applicable.</td>
</tr>
<tr>
<td>&lt;Tab&gt;</td>
<td>Moves to the next focus area.</td>
</tr>
<tr>
<td>&lt;Esc&gt;</td>
<td>Moves to the previous page till you view the main screen.</td>
</tr>
<tr>
<td></td>
<td>Pressing &lt;Esc&gt; in the main screen displays a message that prompts you to save any unsaved changes and restarts the system.</td>

## Table 8. Power Management

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
</table>
| **AC Behavior**         | Allows the computer to power-on automatically, when AC adapter is plugged. The option is disabled.  
• Wake on AC            |
| **Auto On Time**        | Allows you to set the time at which the computer must turn on automatically. The options are:  
• **Disabled** (Default Setting)  
• Every Day  
• Weekdays |
| **Deep Sleep Control**  | Allows you to set where deep sleep is enabled. The options are:  
• **Disabled** (Default Setting)  
• Enabled in S5 only  
• Enabled in S4 and S5 |
| **USB Wake Support**    | Allows you to enable the USB devices to wake the computer from standby mode. The option is disabled  
• Enable USB Wake Support |
| **Wireless Radio Control** | Allows you to control the WLAN and WWAN radio. The options are:  
• Control WLAN radio  
• Control WWAN radio |

Default Setting: Both the options are disabled.
Wake on LAN/WLAN

This option allows the computer to power up from the off state when triggered by a special LAN signal. Wake-up from the Standby state is unaffected by this setting and must be enabled in the operating system. This feature only works when the computer is connected to AC power supply.

- **Disabled** - Does not allow the system to power on by special LAN signals when it receives a wake-up signal from the LAN or wireless LAN. (Default Setting)
- **LAN Only** - Allows the system to be powered on by special LAN signals.
- **WLAN Only**
- **LAN or WLAN**

## Block Sleep

Allows you to block the computer from entering into the sleep state. Option is disabled by default.

- **Block Sleep (S3)**

## Peak Shift

Allows you to set the peak shift. The option is disabled by default.

## Advanced Battery Charge Configuration

Allows you to enable the advance battery charge mode. The option is disabled by default.

## Primary Battery Charge Configuration

Allows you to define how to use the battery charge, when AC is plugged in. The options are:

- **Adaptive** (Default Setting)
- **Standard**
- **Express Charge**
- **Primarily AC use**
- **Custom**

## Battery Slice Charge Configuration

Allows you to define the how to charge the battery. The options are:

- **Standard Charge**
- **Express Charge** (Default Setting)

## Module Bay Battery Charge Configuration

Allows you to define how to charge the battery at standard rate. The options are:

- **Standard**
- **Express Charge** (Default Setting)

**NOTE:** Disable the **Advanced Battery Charge Mode** in order to enable this option.

## Intel(R) Smart Connect Technology

Allows you to enable the system to sense nearby wireless connection while the system is asleep. The option is disabled by default.

## Table 9. POST Behavior

### Updating the BIOS

It is recommended to update your BIOS (system setup), on replacing the system board or if an update is available. For laptops, ensure that your computer battery is fully charged and connected to a power outlet.

1. Re-start the computer.
2. Go to [dell.com/support](http://dell.com/support)
3. Enter the **Service Tag** or **Express Service Code** and click **Submit**.

  - **NOTE:** To locate the Service Tag, click **Where is my Service Tag**?
NOTE: If you cannot find your Service Tag, click **Detect My Product**. Proceed with the instructions on screen.

4. If you are unable to locate or find the Service Tag, click the Product Category of your computer.

5. Choose the **Product Type** from the list.

6. Select your computer model and the **Product Support** page of your computer appears.

7. Click **Get drivers** and click **View All Drivers**.
   The Drivers and Downloads page opens.

8. On the Drivers and Downloads screen, under the **Operating System** drop-down list, select **BIOS**.

9. Identify the latest BIOS file and click **Download File**.
   You can also analyze which drivers need an update. To do this for your product, click **Analyze System for Updates** and follow the instructions on the screen.

10. Select your preferred download method in the **Please select your download method below window**; click **Download File**.
   The File Download window appears.

11. Click **Save** to save the file on your computer.

12. Click **Run** to install the updated BIOS settings on your computer.
   Follow the instructions on the screen.

---

**System and Setup Password**

You can create a system password and a setup password to secure your computer.

<table>
<thead>
<tr>
<th>Password Type</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>System password</td>
<td>Password that you must enter to log on to your system.</td>
</tr>
<tr>
<td>Setup password</td>
<td>Password that you must enter to access and make changes to the BIOS settings of your computer.</td>
</tr>
</tbody>
</table>

⚠️ **CAUTION:** The password features provide a basic level of security for the data on your computer.

⚠️ **CAUTION:** Anyone can access the data stored on your computer if it is not locked and left unattended.

⚠️ **NOTE:** Your computer is shipped with the system and setup password feature disabled.

---

**Assigning a System Password and Setup Password**

You can assign a new **System Password** and/or **Setup Password** or change an existing **System Password** and/or **Setup Password** only when **Password Status** is **Unlocked**. If the Password Status is **Locked**, you cannot change the System Password.

⚠️ **NOTE:** If the password jumper is disabled, the existing System Password and Setup Password are deleted and you need not provide the system password to log on to the computer.

To enter a system setup, press `<F2>` immediately after a power-on or re-boot.

1. In the **System BIOS** or **System Setup** screen, select **System Security** and press `<Enter>`. The **System Security** screen appears.
2. In the **System Security** screen, verify that **Password Status** is **Unlocked**.
3. Select **System Password**, enter your system password, and press `<Enter>` or `<Tab>`.
Use the following guidelines to assign the system password:

- A password can have up to 32 characters.
- The password can contain the numbers 0 through 9.
- Only lower case letters are valid, upper case letters are not allowed.
- Only the following special characters are allowed: space, (‘), (+), (.), (-), (/), (;), ([), (]), (`).

Re-enter the system password when prompted.

4. Type the system password that you entered earlier and click **OK**.
5. Select **Setup Password**, type your system password and press <Enter> or <Tab>.
   A message prompts you to re-type the setup password.
6. Type the setup password that you entered earlier and click **OK**.
7. Press <Esc> and a message prompts you to save the changes.
8. Press <Y> to save the changes.
   The computer reboots.

### Deleting or Changing an Existing System and/or Setup Password

Ensure that the **Password Status** is **Unlocked** (in the System Setup) before attempting to delete or change the existing System and/or Setup password. You cannot delete or change an existing System or Setup password, if the **Password Status** is **Locked**.

To enter the System Setup, press <F2> immediately after a power-on or reboot.

1. In the **System BIOS** or **System Setup** screen, select **System Security** and press <Enter>.
   The **System Security** screen is displayed.
2. In the **System Security** screen, verify that **Password Status** is **Unlocked**.
3. Select **System Password**, alter or delete the existing system password and press <Enter> or <Tab>.
4. Select **Setup Password**, alter or delete the existing setup password and press <Enter> or <Tab>.

   **NOTE:** If you change the System and/or Setup password, re-enter the new password when promoted. If you delete the System and/or Setup password, confirm the deletion when promoted.
5. Press <Esc> and a message prompts you to save the changes.
6. Press <Y> to save the changes and exit from the System Setup.
   The computer reboots.
Diagnostics

If you experience a problem with your computer, run the ePSA diagnostics before contacting Dell for technical assistance. The purpose of running diagnostics is to test your computer’s hardware without requiring additional equipment or risking data loss. If you are unable to fix the problem yourself, service and support personnel can use the diagnostics results to help you solve the problem.

Enhanced Pre-Boot System Assessment (ePSA) Diagnostics

The ePSA diagnostics (also known as system diagnostics) performs a complete check of your hardware. The ePSA is embedded with the BIOS and is launched by the BIOS internally. The embedded system diagnostics provides a set of options for particular devices or device groups allowing you to:

- Run tests automatically or in an interactive mode
- Repeat tests
- Display or save test results
- Run thorough tests to introduce additional test options to provide extra information about the failed device(s)
- View status messages that inform you if tests are completed successfully
- View error messages that inform you of problems encountered during testing

⚠️ CAUTION: Use the system diagnostics to test only your computer. Using this program with other computers may cause invalid results or error messages.

⚠️ NOTE: Some tests for specific devices require user interaction. Always ensure that you are present at the computer terminal when the diagnostic tests are performed.

1. Power-on the computer.
2. As the computer boots, press the <F12> key as the Dell logo appears.
3. On the boot menu screen, select the Diagnostics option.
   The Enhanced Pre-boot System Assessment window is displayed, listing all devices detected in the computer. The diagnostics starts running the tests on all the detected devices.
4. If you wish to run a diagnostic test on a specific device, press <Esc> and click Yes to stop the diagnostic test.
5. Select the device from the left pane and click Run Tests.
6. If there are any issues, error codes are displayed. Note the error code and contact Dell.
Device Status Lights

Table 14. Device Status Lights

1. Turns on when you turn on the computer and blinks when the computer is in a power management mode.
2. Turns on when the computer reads or writes data.
3. Turns on steadily or blinks to indicate battery charge status.
4. Turns on when wireless networking is enabled.

The device status LEDs are usually located either on the top or left side of the keyboard. They display the storage, battery and wireless devices connectivity and activity. Apart from that they can be useful as a diagnostic tool when there's a possible failure to the system.

The following table lists how to read the LED codes when possible errors occur.

Table 15. LED Lights

Battery Status Lights

If the computer is connected to an electrical outlet, the battery light operates as follows:
<table>
<thead>
<tr>
<th>Light State</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Alternately blinking amber light and white</td>
<td>An unauthenticated or unsupported non-Dell AC adapter is attached to your laptop.</td>
</tr>
<tr>
<td>light</td>
<td></td>
</tr>
<tr>
<td>Alternately blinking amber light with steady</td>
<td>Temporary battery failure with AC adapter present.</td>
</tr>
<tr>
<td>white light</td>
<td></td>
</tr>
<tr>
<td>Constantly blinking amber light</td>
<td>Fatal battery failure with AC adapter present.</td>
</tr>
<tr>
<td>Light off</td>
<td>Battery in full charge mode with AC adapter present.</td>
</tr>
<tr>
<td>White light on</td>
<td>Battery in charge mode with AC adapter present.</td>
</tr>
</tbody>
</table>
Technical Specifications

NOTE: Offerings may vary by region. The following specifications are only those required by law to ship with your computer. For more information about the configuration of your computer, go to Help and Support in your Windows operating system and select the option to view information about your computer.

Contacting Dell

NOTE: If you do not have an active Internet connection, you can find contact information on your purchase invoice, packing slip, bill, or Dell product catalog.

Dell provides several online and telephone-based support and service options. Availability varies by country and product, and some services may not be available in your area. To contact Dell for sales, technical support, or customer service issues:

1. Go to dell.com/support.
2. Select your support category.
3. Verify your country or region in the Choose a Country/Region drop-down list at the bottom of the page.
4. Select the appropriate service or support link based on your need.
