

OpenManage Server Administrator 7.4.1 — Release Highlights

Dell OpenManage Server Administrator Version 7.4.1 — Release Highlights

At Dell, we strive to make Systems Management Support available to you at all times. We believe in enhancing our customer experience by providing our best support for all Systems Management Software product(s).

This document provides information about the key release highlights of Dell OpenManage Server Administrator 7.4.1.

Dell OpenManage Server Administrator (OMSA) is a software agent that provides a comprehensive, one-to-one systems management solution in two ways: from an integrated, web browser-based Graphical User Interface (GUI) and from a Command Line Interface (CLI) through the operating system.

The key release highlights of Dell OpenManage Server Administrator 7.4.1 are:

- Support for Dell PowerEdge R920 v1.1 with the following added advantages:
 - Support for PowerEdge RAID Controller (PERC) H330 and H830 family of hardware controllers.
 - Support for MD1400 and MD1420 series of storage enclosures.
 - Support for VMware vSphere (ESXi) 5.5 U2.

NOTE: If you are using Dell PowerEdge R920 v1.1, ensure that the server contains the following firmware versions:

Firmware	Version
BIOS	1.3.1
iDRAC	1.65.65
Lifecycle Controller	1.4.8.5
PowerEdge RAID Controller (PERC) 9.1	25.2.1.0037

- Support for Dell PowerEdge FM120.
 - NOTE:** Dell Systems Build and Update Utility is not supported on PowerEdge FM120.
- Support for Microsoft Windows Server 2008 (32-bit) on PowerEdge R220.
- For systems running the Red Hat Enterprise Linux 7 operating system:
 - Support for all Dell's 12th generation of PowerEdge servers — Rx20, Mx20, and Tx20 series.
 - Support for the following Dell's 11th generation of PowerEdge servers — R415, R515, R610, R710, R715, R815, R910, M910, M915, and T110 II
 - NOTE:** If you are using Dell's 11th generation or 12th generation of PowerEdge servers running the Red Hat Enterprise Linux 7 operating system and want to install Dell OpenManage Server Administrator 7.4.1. Go to dell.com/support/home and download the OM-SrvAdmin-Dell-Web-LX-7.4.1-1341.RHEL7.x86_64_A00.tar.gz web pack.
 - NOTE:** Dell Systems Build and Update Utility is not supported on systems running the Red Hat Enterprise Linux 7 operating system.

For a complete list of supported operating systems and platforms, see the latest Systems Management - Software Support Matrix available at dell.com/openmanagemanuals
