Set up your computer

1. Connect the power adapter and press the power button.
2 Finish operating system setup.

For Windows:

a) Connect to a network.

NOTE: If you are connecting to a secured wireless network, enter the password for the wireless network access when prompted.

b) Sign in to your Microsoft account or create a new account.

For Ubuntu:

Follow the instructions on the screen to finish setup.
Locate Dell apps in Windows.

NOTE: Microsoft Windows 10 S is only supported on computers shipped with Intel Celeron processor with 32 GB storage.

If your computer is running Microsoft Windows 10 S operating system and there are no Dell apps available, you can download them from the Microsoft Store.

NOTE: Dell apps will be available soon on Microsoft Store.

Create recovery drive for Windows.

NOTE: It is recommended to create a recovery drive to troubleshoot and fix problems that may occur with Windows.

For more information, see Create a USB recovery drive for Windows.
Create a USB recovery drive for Windows

Dell recommends that you create a recovery drive to troubleshoot and fix problems that may occur with Windows. An empty USB flash drive with a minimum capacity of 16 GB is required to create the recovery drive.

NOTE: The following steps may vary depending on the version of Windows installed. Refer to the Microsoft support site for latest instructions.

1. Connect the USB flash drive to your computer.
2. In Windows search, type Recovery.
3. In the search results, click Create a recovery drive.
   The User Account Control window is displayed.
4. Click Yes to continue.
   The Recovery Drive window is displayed.
5. Select Back up system files to the recovery drive and click Next.
6. Select the USB flash drive and click Next.
   A message appears, indicating that all data in the USB flash drive will be deleted.
7. Click Create.

   NOTE: This process may take several minutes to complete.
8. Click Finish.

Reinstall Windows using a USB recovery drive

CAUTION: This process formats the hard drive and removes all data on your computer. Ensure that you back up data on your computer before beginning this task.

NOTE: Before reinstalling Windows, ensure your computer has more than 2 GB of memory and more than 32 GB of storage space.

1. Connect the USB recovery drive to your computer.
2. Restart your computer.
3 Press F12 after the Dell logo is displayed on the screen to access the boot menu. A **Preparing one-time boot menu** message appears.

4 After the boot menu loads, select the USB recovery device under **UEFI BOOT**. The system reboots and a screen to **Choose the keyboard layout** is displayed.

5 Choose your keyboard layout.

6 In the **Choose an option** screen, click **Troubleshoot**.

7 Click **Recover from a drive**.

8 Choose one of the following options:

   - **Just remove my files** to do a quick format.
   - **Fully clean the drive** to do a complete format.

9 Click **Recover** to start the recovery process. This will take several minutes to complete and your computer will restart during this process.
