Dell Latitude 5300
Setup and specifications guide
Notes, cautions, and warnings

**NOTE:** A NOTE indicates important information that helps you make better use of your product.

**CAUTION:** A CAUTION indicates either potential damage to hardware or loss of data and tells you how to avoid the problem.

**WARNING:** A WARNING indicates a potential for property damage, personal injury, or death.

## 6 System setup

- **Boot menu**
- **Navigation keys**
- **Boot Sequence**
- **System setup options**
  - General options
  - System configuration
  - Video screen options
  - Security
  - Secure boot
  - Intel Software Guard Extensions options
  - Performance
  - Power management
  - Post behavior
  - Manageability
  - Virtualization support
  - Wireless options
  - Maintenance
  - System logs
- Updating the BIOS in Windows
- Updating BIOS on systems with BitLocker enabled
- Updating your system BIOS using a USB flash drive
- System and setup password
  - Assigning a system setup password
  - Deleting or changing an existing system setup password

## 7 Getting help

- **Contacting Dell**
Set up your computer

1. Connect the power adapter and press the power button.
   
   **NOTE:** To conserve battery power, the battery might enter power saving mode.

2. Finish Windows system setup. Follow the on-screen instructions to complete the setup. When setting up, Dell recommends that you:
   - Connect to a network for Windows updates.
     
     **NOTE:** If connecting to a secured wireless network, enter the password for the wireless network access when prompted.
   - If connected to the internet, sign-in with or create a Microsoft account. If not connected to the internet, create an offline account.
   - On the **Support and Protection** screen, enter your contact details.

3. Locate and use Dell apps from the Windows Start menu—Recommended

<table>
<thead>
<tr>
<th>Table 1. Locate Dell apps</th>
</tr>
</thead>
<tbody>
<tr>
<td>Dell apps</td>
</tr>
<tr>
<td>Dell Product Registration</td>
</tr>
</tbody>
</table>
Register your computer with Dell.

**Details**

**Dell Help & Support**
Access help and support for your computer.

**SupportAssist**
Proactively checks the health of your computer's hardware and software.

**NOTE**: Renew or upgrade your warranty by clicking the warranty expiry date in SupportAssist.

**Dell Update**
Updates your computer with critical fixes and important device drivers as they become available.

**Dell Digital Delivery**
Download software applications including software that is purchased but not preinstalled on your computer.

**NOTE**: It is recommended to create a recovery drive to troubleshoot and fix problems that may occur with Windows.

For more information, see Create a USB recovery drive for Windows.
Create a USB recovery drive for Windows

Create a recovery drive to troubleshoot and fix problems that may occur with Windows. An empty USB flash drive with a minimum capacity of 16 GB is required to create the recovery drive.

NOTE: This process may take up to an hour to complete.

NOTE: The following steps may vary depending on the version of Windows installed. Refer to the Microsoft support site for latest instructions.

1. Connect the USB flash drive to your computer.
2. In Windows search, type Recovery.
3. In the search results, click Create a recovery drive.
   The User Account Control window is displayed.
4. Click Yes to continue.
   The Recovery Drive window is displayed.
5. Select Back up system files to the recovery drive and click Next.
6. Select the USB flash drive and click Next.
   A message appears, indicating that all data in the USB flash drive will be deleted.
7. Click Create.
8. Click Finish.

For more information about reinstalling Windows using the USB recovery drive, see the Troubleshooting section of your product’s Service Manual at www.dell.com/support/manuals.

**Security Software**

**Table 31. Security Software specifications**

**Specifications**

- Dell Client Command Suite

Optional Dell Data Security and Management Software

- Dell Endpoint Security Suite Enterprise
- Dell Data Guardian
- Dell Encryption Enterprise
- Dell Encryption Personal
- Dell Threat Defense
- MozyPro or MozyEnterprise
- RSA NetWitness Endpoint
- RSA SecurID Access
- VMware Workspace ONE
- Absolute Endpoint Visibility and Control
This chapter details the supported operating systems along with instructions on how to install the drivers.

**Downloading drivers**

1. Turn on the tabletnotebook.
2. Go to Dell.com/support.
3. Click Product Support, enter the Service Tag of your tabletnotebook, and then click Submit.

   📌 **NOTE:** If you do not have the Service Tag, use the auto detect feature or manually browse for your tabletnotebook model.

4. Click Drivers and Downloads.
5. Select the operating system installed on your tabletnotebook.
6. Scroll down the page and select the driver to install.
7. Click Download File to download the driver for your tabletnotebook.
8. After the download is complete, navigate to the folder where you saved the driver file.
9. Double-click the driver file icon and follow the instructions on the screen.
System setup

⚠️ CAUTION: Unless you are an expert computer user, do not change the settings in the BIOS Setup program. Certain changes can make your computer work incorrectly.

NOTE: Before you change BIOS Setup program, it is recommended that you write down the BIOS Setup program screen information for future reference.

Use the BIOS Setup program for the following purposes:

- Get information about the hardware installed in your computer, such as the amount of RAM and the size of the hard drive.
- Change the system configuration information.
- Set or change a user-selectable option, such as the user password, type of hard drive installed, and enabling or disabling base devices.

Topics:
- Boot menu
- Navigation keys
- Boot Sequence
- System setup options
- Updating the BIOS in Windows
- System and setup password

Boot menu

Press <F12> when the Dell logo appears to initiate a one-time boot menu with a list of the valid boot devices for the system. Diagnostics and BIOS Setup options are also included in this menu. The devices listed on the boot menu depend on the bootable devices in the system. This menu is useful when you are attempting to boot to a particular device or to bring up the diagnostics for the system. Using the boot menu does not make any changes to the boot order stored in the BIOS.

The options are:

- UEFI Boot:
  - Windows Boot Manager
- Other Options:
  - BIOS Setup
  - BIOS Flash Update
  - Diagnostics
  - Change Boot Mode Settings

Navigation keys

NOTE: For most of the System Setup options, changes that you make are recorded but do not take effect until you restart the system.

<table>
<thead>
<tr>
<th>Keys</th>
<th>Navigation</th>
</tr>
</thead>
<tbody>
<tr>
<td>Up arrow</td>
<td>Moves to the previous field</td>
</tr>
</tbody>
</table>
Boot Sequence

Boot Sequence allows you to bypass the System Setup–defined boot device order and boot directly to a specific device (for example: optical drive or hard drive). During the Power-on Self Test (POST), when the Dell logo appears, you can:

- Access System Setup by pressing F2 key
- Bring up the one-time boot menu by pressing F12 key

The one-time boot menu displays the devices that you can boot from including the diagnostic option. The boot menu options are:

- Removable Drive (if available)
- STXXXX Drive
  - XXX denotes the SATA drive number.
  - Optical Drive (if available)
  - SATA Hard Drive (if available)
  - Diagnostics
  - Choosing Diagnostics, will display the ePSA diagnostics screen.

The boot sequence screen also displays the option to access the System Setup screen.

System setup options

- Depending on the tablet/laptop and its installed devices, the items listed in this section may or may not appear.

General options

Table 32. General

<table>
<thead>

<td></td>
</tr>
<tr>
<td>- Processor Information</td>
<td></td>
</tr>
</tbody>
</table>
### Option Description

**Battery Information**
Displays the battery status and the type of AC adapter connected to the computer.

**Boot Sequence**
Allows you to change the order in which the computer attempts to find an operating system.

The options are:

- **Windows Boot Manager**
- **Boot List Option**
  - Allows you to change the boot list options.
    - **Legacy External Devices**
    - **UEFI**—Default

**Advanced Boot Options**
Allows you to Enable Legacy Option ROMs.

The options are:

- **Enable Legacy Option ROMs**—Default
- **Enable Attempt Legacy Boot**

**UEFI Boot Path Security**
Allows you to control whether the system prompts the user to enter the Admin password when booting to a UEFI boot path.

Click one of the following options:

- **Always, Except Internal HDD**—Default
- **Always**
- **Never**

**Date/Time**
Allows you to set the date and time. The change to the system date and time takes effect immediately.

### Updating the BIOS in Windows

It is recommended to update your BIOS (System Setup), when you replace the system board or if an update is available. For laptops, ensure that your computer battery is fully charged and connected to a power outlet.

  _NOTE:_ If BitLocker is enabled, it must be suspended prior to updating the system BIOS, and then re-enabled after the BIOS update is completed.

1. Restart the computer.
2. Go to [Dell.com/support](https://www.dell.com/support).
   - Enter the Service Tag or Express Service Code and click Submit.
   - Click Detect Product and follow the instructions on screen.
3. If you are unable to detect or find the Service Tag, click Choose from all products.
4. Choose the Products category from the list.

  _NOTE:_ Choose the appropriate category to reach the product page

5. Select your computer model and the Product Support page of your computer appears.
6. Click Get drivers and click Drivers and Downloads.
   The Drivers and Downloads section opens.
7. Click Find it myself.
8. Click BIOS to view the BIOS versions.
9. Identify the latest BIOS file and click Download.
10. Select your preferred download method in the Please select your download method below window, click Download File.
    The File Download window appears.
11. Click Save to save the file on your computer.
12. Click Run to install the updated BIOS settings on your computer.
Follow the instructions on the screen.

**Updating BIOS on systems with BitLocker enabled**

⚠️ **CAUTION:** If BitLocker is not suspended before updating the BIOS, the next time you reboot the system it will not recognize the BitLocker key. You will then be prompted to enter the recovery key to progress and the system will ask for this on each reboot. If the recovery key is not known this can result in data loss or an unnecessary operating system re-install. For more information on this subject, see Knowledge Article: [https://www.dell.com/support/article/sln153694](https://www.dell.com/support/article/sln153694)

**Updating your system BIOS using a USB flash drive**

If the system cannot load into Windows but there is still a need to update the BIOS, download the BIOS file using another system and save it to a bootable USB Flash Drive.

⚠️ **NOTE:** You will need to use a bootable USB Flash drive. Please refer to the following article for further details: [https://www.dell.com/support/article/us/en/19/sln143196/](https://www.dell.com/support/article/us/en/19/sln143196/)

1. Download the BIOS update .EXE file to another system.
2. Copy the file e.g. O9010A12.EXE onto the bootable USB Flash drive.
3. Insert the USB Flash drive into the system that requires the BIOS update.
4. Restart the system and press F12 when the Dell Splash logo appears to display the One Time Boot Menu.
5. Using arrow keys, select **USB Storage Device** and click Return.
6. The system will boot to a Diag C:\> prompt.
7. Run the file by typing the full filename e.g. O9010A12.exe and press Return.
8. The BIOS Update Utility will load, follow the instructions on screen.

System and setup password

Table 46. System and setup password

<table>
<thead>
<tr>
<th>Password type</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>System password</td>
<td>Password that you must enter to log on to your system.</td>
</tr>
<tr>
<td>Setup password</td>
<td>Password that you must enter to access and make changes to the BIOS settings of your computer.</td>
</tr>
</tbody>
</table>

You can create a system password and a setup password to secure your computer.

⚠️ CAUTION: The password features provide a basic level of security for the data on your computer.

⚠️ CAUTION: Anyone can access the data stored on your computer if it is not locked and left unattended.

⚠️ NOTE: System and setup password feature is disabled.

Assigning a system setup password

You can assign a new System or Admin Password only when the status is in Not Set.

To enter the system setup, press F2 immediately after a power-on or re-boot.

1. In the System BIOS or System Setup screen, select Security and press Enter.
   The Security screen is displayed.
2. Select System/Admin Password and create a password in the Enter the new password field.
   Use the following guidelines to assign the system password:
   • A password can have up to 32 characters.
   • The password can contain the numbers 0 through 9.
   • Only lower case letters are valid, upper case letters are not allowed.
   • Only the following special characters are allowed: space, ("), (+), (-), (.), (;), ([), (]), (`).
3. Type the system password that you entered earlier in the Confirm new password field and click OK.
4. Press Esc and a message prompts you to save the changes.
5. Press Y to save the changes.
   The computer reboots.

Deleting or changing an existing system setup password

Ensure that the Password Status is Unlocked (in the System Setup) before attempting to delete or change the existing System and/or Setup password. You cannot delete or change an existing System or Setup password, if the Password Status is Locked.

To enter the System Setup, press F2 immediately after a power-on or reboot.

1. In the System BIOS or System Setup screen, select System Security and press Enter.
   The System Security screen is displayed.
2. In the System Security screen, verify that Password Status is Unlocked.
3. Select System Password, alter or delete the existing system password and press Enter or Tab.
4. Select Setup Password, alter or delete the existing setup password and press Enter or Tab.

⚠️ NOTE: If you change the System and/or Setup password, re-enter the new password when prompted. If you delete the System and/or Setup password, confirm the deletion when prompted.

42 System setup
5 Press Esc and a message prompts you to save the changes.
6 Press Y to save the changes and exit from System Setup.
   The computer reboot.
Contacting Dell

NOTE: If you do not have an active Internet connection, you can find contact information on your purchase invoice, packing slip, bill, or Dell product catalog.

Dell provides several online and telephone-based support and service options. Availability varies by country and product, and some services may not be available in your area. To contact Dell for sales, technical support, or customer service issues:

1. Go to Dell.com/support.
2. Select your support category.
3. Verify your country or region in the Choose a Country/Region drop-down list at the bottom of the page.
4. Select the appropriate service or support link based on your need.
