Notes, cautions, and warnings

**NOTE:** A NOTE indicates important information that helps you make better use of your computer.

**CAUTION:** A CAUTION indicates either potential damage to hardware or loss of data and tells you how to avoid the problem.

**WARNING:** A WARNING indicates a potential for property damage, personal injury, or death.

Before working inside your computer

Use the following safety guidelines to help protect your computer from potential damage and to help to ensure your personal safety. Unless otherwise noted, each procedure included in this document assumes that the following conditions exist:

- You have read the safety information that shipped with your computer.
- A component can be replaced or— if purchased separately— installed by performing the removal procedure in reverse order.

⚠️ **WARNING:** Before working inside your computer, read the safety information that shipped with your computer. For additional safety best practices information, see the Regulatory Compliance Homepage at www.dell.com/regulatory_compliance

⚠️ **CAUTION:** Many repairs may only be done by a certified service technician. You should only perform troubleshooting and simple repairs as authorized in your product documentation, or as directed by the online or telephone service and support team. Damage due to servicing that is not authorized by Dell is not covered by your warranty. Read and follow the safety instructions that came with the product.

⚠️ **CAUTION:** To avoid electrostatic discharge, ground yourself by using a wrist grounding strap or by periodically touching an unpainted metal surface, such as a connector on the back of the computer.

⚠️ **CAUTION:** Handle components and cards with care. Do not touch the components or contacts on a card. Hold a card by its edges or by its metal mounting bracket. Hold a component such as a processor by its edges, not by its pins.

⚠️ **CAUTION:** When you disconnect a cable, pull on its connector or on its pull-tab, not on the cable itself. Some cables have connectors with locking tabs; if you are disconnecting this type of cable, press in on the locking tabs before you disconnect the cable. As you pull connectors apart, keep them evenly aligned to avoid bending any connector pins. Also, before you connect a cable, ensure that both connectors are correctly oriented and aligned.

⚠️ **NOTE:** The color of your computer and certain components may appear differently than shown in this document.

To avoid damaging your computer, perform the following steps before you begin working inside the computer.

1. Ensure that your work surface is flat and clean to prevent the computer cover from being scratched.
2. Turn off your computer (see Turning Off Your Computer).
3. If the computer is connected to a docking device (docked) such as the optional Media Base or Battery Slice, undock it.

⚠️ **CAUTION:** To disconnect a network cable, first unplug the cable from your computer and then unplug the cable from the network device.

4. Disconnect all network cables from the computer.
5. Disconnect your computer and all attached devices from their electrical outlets.
6. Close the display and turn the computer upside-down on a flat work surface.

⚠️ **NOTE:** To avoid damaging the system board, you must remove the main battery before you service the computer.

7. Remove the main battery.
8. Turn the computer top-side up.
Open the display.

Press the power button to ground the system board.

CAUTION: To guard against electrical shock, always unplug your computer from the electrical outlet before opening the display.

CAUTION: Before touching anything inside your computer, ground yourself by touching an unpainted metal surface, such as the metal at the back of the computer. While you work, periodically touch an unpainted metal surface to dissipate static electricity, which could harm internal components.

Remove any installed ExpressCards or Smart Cards from the appropriate slots.

**Turning Off Your Computer**

CAUTION: To avoid losing data, save and close all open files and exit all open programs before you turn off your computer.

1. Shut down the operating system:
   - In Windows 8:
     a. Using a touch-enabled device:
        1. Swipe in from the right edge of the screen, opening the Charms menu and select **Settings**.
        2. Select the power button and then select **Shut down**
     b. Using a mouse:
        1. Point to upper-right corner of the screen and click **Settings**.
        2. Click the power button and select **Shut down**
   - In Windows 7:
     1. Click **Start**.
     2. Click **Shut Down**.
     or
     1. Click **Start**.
     2. Click the arrow in the lower-right corner of the **Start** menu as shown below, and then click **Shut Down**.

2. Ensure that the computer and all attached devices are turned off. If your computer and attached devices did not automatically turn off when you shut down your operating system, press and hold the power button for about 4 seconds to turn them off.

**After working inside your computer**

After you complete any replacement procedure, ensure you connect any external devices, cards, and cables before turning on your computer.

CAUTION: To avoid damage to the computer, use only the battery designed for this particular Dell computer. Do not use batteries designed for other Dell computers.

1. Connect any external devices, such as a port replicator, battery slice, or media base, and replace any cards, such as an ExpressCard.
2. Connect any telephone or network cables to your computer.

CAUTION: To connect a network cable, first plug the cable into the network device and then plug it into the computer.

3. Replace the battery.
4. Connect your computer and all attached devices to their electrical outlets.
5 Turn on your computer.
Removing and installing components

This section provides detailed information on how to remove or install the components from your computer.

Recommended tools

The procedures in this document require the following tools:

- Phillips #0 screwdriver
- Phillips #1 screwdriver
- Small plastic scribe

System Overview

Figure 1. Inside View — Back

1. coin-cell battery
2. memory modules
3. optical drive
4. WLAN card
5. hard drive
Removing the Battery

1. Follow the procedures in Before Working Inside Your Computer.
2. Perform the following steps:
   a. Slide the battery release latches into the unlock position.
   b. Push and remove the battery from the computer.
Installing the Battery

1. Slide the battery into its slot until it clicks into place.
2. Follow the procedures in After Working Inside Your Computer.

Removing the SD Card

1. Follow the procedures in Before Working Inside Your Computer.
2. Press in on the SD card to release it from the computer.
3. Slide the SD card out of the computer.

Installing the SD Card

1. Push the SD card into its slot until it clicks into place.
2. Follow the procedures in After Working Inside Your Computer.

Removing the ExpressCard

1. Follow the procedures in Before Working On Your Computer.
2. Perform the following steps:
   a. Push in on the ExpressCard to release from the computer [1].
   b. Slide the ExpressCard out of the computer [2].

Installing the ExpressCard

1. Slide the ExpressCard in its slot until it clicks in place.
2. Follow the procedures in After Working Inside Your Computer.

Removing the Display Bezel

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove the battery.
3. Perform the following steps:
   a. Pry up the bottom edge of the display bezel.
   b. Work your way around the sides and top edge of the display bezel.
4 Remove the display bezel from the computer.

## Installing the Display Bezel

1 Place the display bezel onto the display assembly.
2 Starting from the top corner, press on the display bezel and work around the entire bezel until it snaps onto the display assembly.
3 Install the battery.
4 Follow the procedures in *After Working Inside Your Computer*.

## Removing the Display Panel

1 Follow the procedures in *Before Working Inside Your Computer*.
2 Remove:
   a battery
   b display bezel
3 Remove the screws that secure the display panel and flip the panel over.

4 Perform the following steps:
   a Lift the mylar tape and disconnect the low-voltage differential signaling (LVDS) cable from the back of the display panel.
   b Remove the display panel from the display assembly.
Installing the Display Panel

1. Place the display panel to the display assembly.
2. Align the display panel in its original position.
3. Connect the low-voltage differential signaling (LVDS) cable to the display panel and attach the tape.
4. Flip the display panel over and tighten the screws to secure the display panel.
5. Install:
   a. display bezel
   b. battery
6. Follow the procedures in After Working Inside Your Computer.

Removing the Camera

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove:
   a. battery
   b. display bezel
3. Perform the following steps:
   a. Remove the screw that secures the camera and microphone module.
   b. Disconnect the camera cable.
   c. Lift and remove the camera and microphone module.

Installing the Camera

1. Place the camera and microphone module on its place.
2. Connect the camera cable.
3. Tighten the screw to secure the camera and microphone module.
4. Install:
Removing the Keyboard Trim

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove the battery.
3. Perform the following steps:
   a. Remove the screw that secures the keyboard trim at the back of the computer.
   b. Pry up the keyboard trim on its sides and the top edge.
   c. Lift upwards and remove the keyboard trim from the computer.

Installing the Keyboard Trim

1. Align the keyboard trim to its place.
2. Press along the sides of the keyboard trim until it snaps in place.
3. Tighten the screw at the back of the computer to secure the keyboard trim.
4. Install the battery.
5. Follow the procedures in After Working Inside Your Computer.

Removing the Keyboard

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove:
   a. battery
   b. keyboard trim
3. Perform the following steps:
   a. Remove the screws at the back of the computer and flip the computer over.
   b. Remove the screws that secure the keyboard to the computer.
Perform the following steps:
   a  Slide the keyboard and flip the keyboard over [1] and [2]
   b  Disconnect the keyboard cable [1] and [2] and lift the keyboard to remove from the computer [3].

### Installing the Keyboard

1. Connect the keyboard cable to the keyboard.
2. Place the keyboard into its place until all the metal tabs fit into their positions.
3. Press down on the keyboard to the left and right side ensuring that all the snaps are fully engaged with the computer.
4. Install the screws to secure the keyboard to the palmrest.
5. Install the screws at the back of the computer.
6. Install:
   a  keyboard trim
   b  battery
7. Follow the procedures in *After Working Inside Your Computer*.

### Removing the Base Cover

1. Follow the procedures in *Before Working Inside Your Computer*.
2. Remove the battery.
3. Perform the following steps:
   a  Remove the screws that secure the base cover.
   b  Pry the base cover towards the front of the computer and remove it from the computer.
Installing the Base Cover

1. Insert the base cover into its slot until it clicks into place.
2. Tighten the screws to secure the base cover to the computer.
3. Install the battery.
4. Follow the procedures in After Working Inside Your Computer.

Removing the Memory Module

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove:
   a. battery
   b. base cover
3. Pry the retention clips away from the memory module until it pops up.
4. Lift up the memory module and remove it from the computer.

Installing the Memory Module

1. Insert the memory into the memory socket.
2. Press the clips to secure the memory module to the system board.
3. Install:
   a. base cover
   b. battery
4. Follow the procedures in After Working Inside Your Computer.
Removing the Hard Drive

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove:
   a. battery
   b. base cover
3. Perform the following steps:
   a. Remove the screws that secure the hard drive in place.
   b. Pull the hard drive to remove from its connectors.

Installing the Hard Drive

1. Place the hard-drive bracket on the hard drive and tighten the screws to secure the hard-drive bracket to the hard drive.
2. Place the hard drive on its connector.
3. Install:
   a. base cover
   b. battery
4. Follow the procedures in After Working Inside Your Computer.
Removing the Hard-Drive Cage

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove:
   a. battery
   b. base cover
   c. hard drive
3. Perform the following steps:
   a. Remove the screws that secure the hard-drive cage in place.
   b. Pull the hard-drive cage to remove from the computer.

Installing the Hard-Drive Cage

1. Place the hard-drive cage on its place.
2. Tighten the screws to secure the hard-drive cage.
3. Install:
   a. hard drive
   b. base cover
   c. battery
4. Follow the procedures in After Working Inside Your Computer.

Removing the Optical Drive

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove:
   a. battery
   b. base cover
3. Perform the following steps:
   a. Remove the screw that secures the optical drive to the computer.
   b. Push the optical drive away to remove it from the computer.
4 After removing the optical-drive bracket, perform the following steps:
   a Remove the screws that secure the optical-drive bracket [1].
   b Remove the optical-drive bracket from the optical drive [2].

5 Disengage the optical drive bezel tabs to separate the optical drive bezel from the optical drive.

6 Remove the optical-drive bezel.

Installing the Optical Drive

1 Engage the optical-drive bezel tabs to attach the optical-drive bezel to the optical drive.
2 Install the optical-drive bracket.
3 Tighten the screws to secure the optical-drive bracket.
4 Insert the optical drive into the computer.
5 Tighten the screw to secure the optical drive in its place.
6 Install:
   a base cover
   b battery
7 Follow the procedures in After Working Inside Your Computer.

Removing the WLAN Card

1 Follow the procedures in Before Working Inside Your Computer.
2 Remove:
   a battery
   b base cover
3 Perform the following steps:
   a Disconnect the antennae cables from the WLAN card.
b. Remove the screw that secures the WLAN card to the computer.
c. Remove the WLAN card from its slot on the system board.

Installing the WLAN Card

1. Insert the WLAN card into its connector on the system board.
2. Connect the antenna cables to the respective connectors marked on the WLAN card.
3. Tighten the screw to secure the WLAN card to the computer.
4. Install:
   a. base cover
   b. battery
5. Follow the procedures in After Working Inside Your Computer.

Removing the Coin-Cell Battery

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove:
   a. battery
   b. base cover
3. Perform the following steps:
   a. Disconnect the coin-cell battery cable from the system board.
   b. Pry and remove the coin-cell battery from the adhesive.

Installing the Coin-Cell Battery

1. Place the coin-cell battery on the system board with adhesive side downwards.
2. Connect the coin-cell battery cable to the system board.
3. Install:
   a. base cover
   b. battery
4. Follow the procedures in After Working Inside Your Computer.
Removing the Display Hinge

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove:
   a. battery
   b. base cover
   c. keyboard trim
   d. keyboard
3. Perform the following steps:
   a. Remove the screws that secure the display hinge at the front and back of the computer.
   b. Lift and remove the display hinge from the computer.

Installing the Display Hinge

1. Place the display hinge on the computer.
2. Tighten the screws to secure the display hinge at the front and back of the computer.
3. Install:
   a. keyboard
   b. keyboard trim
   c. base cover
   d. battery
4. Follow the procedures in After Working Inside Your Computer.

Removing the Palmrest

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove:
   a. SD card
   b. battery
   c. base cover
   d. keyboard trim
   e. keyboard
   f. memory
   g. optical drive
   h. hard drive
   i. hard-drive cage
   j. display hinge
3. Remove the screws at the back of the computer and disconnect:
a power-connector cable [1] and [2]
b media-buttons cable [1] and [2]
c touch-pad cable [1] and [2]
d fingerprint-scanner cable [1] and [2]

Perform the following steps:

a Remove the screws that secure the palmrest of the computer.
b Lift and remove the palmrest from the computer.

Installing the Palmrest

1 Align the palmrest assembly to its original position in the computer and snap it into place.
2 Connect the following cables to the system board:
a power-button cable
b fingerprint-scanner cable
c touch-pad cable
d media button cable
3 Tighten the screws to secure the palmrest at the front and back of the computer.
4 Install:
a display hinge
b hard drive
c optical drive
d memory
e keyboard
f keyboard trim
g base cover
h battery
i SD card
Removing the ExpressCard Cage

1. Follow the procedures in After Working Inside Your Computer.
2. Remove:
   a. SD card
   b. battery
   c. base cover
   d. keyboard trim
   e. keyboard
   f. display hinge
   g. palmrest
3. Perform the following steps:
   a. Remove the screws that secure the ExpressCard cage.
   b. Lift and remove the ExpressCard cage from the computer.

Installing the ExpressCard Cage

1. Align the ExpressCard cage to its original position on the computer and snap it into place.
2. Install the screws that secure the ExpressCard cage to the system board.
3. Install:
   a. palmrest
   b. display hinge
   c. keyboard trim
   d. keyboard
   e. base cover
   f. battery
   g. SD card
4. Follow the procedures in After Working Inside Your Computer.

Removing the System Fan

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove:
   a. SD card
   b. battery
   c. base cover
   d. keyboard trim
   e. keyboard
   f. display hinge
   g. palmrest
3. Perform the following steps:
   a. Lift and remove the ExpressCard cage from the computer.

Follow the procedures in After Working Inside Your Computer.
Perform the following steps:

a. Disconnect the I/O board cable and system-fan cable [1] and [2].
b. Remove the screws that secure the system fan and lift to remove the system fan from the computer.

Installing the System Fan

1. Place the system fan on the computer.
2. Connect the system-fan cable to the system board.
3. Connect the I/O board cable to its connector.
4. Tighten the screws to secure the system fan on the computer.
5. Install:
   a. palmrest
   b. display hinge
   c. memory
   d. hard drive
   e. optical drive
   f. keyboard
   g. keyboard trim
   h. base cover
   i. battery
   j. SD card
6. Follow the procedures in After Working Inside Your Computer.

Removing the System Board

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove:
   a. SD card
   b. battery
   c. base cover
3 Disconnect:
   a coin-cell battery cable
   b power-connector cable
   c speaker cable

4 Flip the computer and perform the following steps:
   a Remove the screws that secure the display-cable connector and remove it from the system board.
   b Disconnect the display cable and LED board cable from the system board.

5 Perform the following steps:
   a Remove the screws that secure the system board on the computer.
   b Lift and remove the system board from the computer.
Installing the System Board

1. Align the system board into its original position on the computer.
2. Replace and tighten the screws to secure the system board to the computer.
3. Connect the following cables:
   a. I/O board cable
   b. LED board cable
4. Turn over the computer and connect:
   a. Coin-cell battery cable
   b. Power-connector cable
   c. Speaker cable
5. Install:
   a. ExpressCard cage
   b. System fan
   c. Palmrest
   d. Display hinge
   e. WLAN card
   f. Hard-drive cage
   g. Hard drive
   h. Optical drive
   i. Memory
   j. Keyboard
   k. Keyboard trim
   l. Base cover
   m. Battery
   n. SD card
6. Follow the procedures in After Working Inside Your Computer.

Removing the Heatsink

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove:
   a. SD card
   b. Battery
   c. Base cover
   d. Keyboard trim
   e. Keyboard
   f. Memory
   g. Optical drive
Perform the following steps:

1. Remove the screws that secure the heatsink in place.
2. Lift to remove the heatsink from the computer.

Installing the Heatsink

1. Place the heatsink on the system board.
2. Tighten the screws to secure the heatsink to the computer.
3. Install:
   a. system board
   b. ExpressCard cage
   c. system fan
   d. palmrest
   e. display hinge
   f. WLAN card
   g. hard drive
   h. optical drive
   i. memory
   j. keyboard
   k. keyboard trim
   l. base cover
   m. battery
   n. SD card
4. Follow the procedures in After Working Inside Your Computer.

Removing the I/O Board (Left)

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove:
Perform the following steps:

a. Remove the screw that secures the left I/O board on the computer.
b. Lift the I/O board and remove from the computer.

Installing the I/O Board (Left)

1. Place the I/O board on the computer.
2. Tighten the screw to secure the I/O board to the computer.
3. Install:
   a. system board
   b. ExpressCard cage
   c. system fan
   d. palmrest
   e. display hinge
   f. WLAN card
   g. hard drive
   h. optical drive
   i. memory
   j. keyboard
   k. keyboard trim
   l. base cover
   m. battery
   n. SD card
4. Follow the procedures in After Working Inside Your Computer.
Removing the I/O Board (Right)

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove:
   a. SD card
   b. battery
   c. base cover
   d. keyboard trim
   e. keyboard
   f. memory
   g. optical drive
   h. hard drive
   i. WLAN card
   j. display hinge
   k. palmrest
   l. system fan
   m. ExpressCard cage
   n. system board
3. Perform the following steps:
   a. Remove the screws that secure the I/O board on the computer.
   b. Lift the I/O board and remove from the computer.

Installing the I/O Board (Right)

1. Place the I/O board on the computer.
2. Tighten the screws to secure the I/O board to the computer.
3. Install:
   a. system board
   b. ExpressCard cage
   c. system fan
   d. palmrest
   e. display hinge
   f. WLAN card
   g. hard drive
   h. optical drive
   i. memory
   j. keyboard
   k. keyboard trim
Removing the Power Connector

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove:
   a. SD card
   b. battery
   c. base cover
   d. keyboard trim
   e. keyboard
   f. memory
   g. hard drive
   h. optical drive
   i. WLAN card
   j. display hinge
   k. palmrest
   l. ExpressCard cage
   m. system fan
   n. system board
3. Perform the following steps:
   a. Remove the power-connector cable from the routing channels.
   b. Lift and remove the power connector from the computer.

Installing the Power Connector

1. Place the power connector on its place in the computer.
2. Route the power-connector cable on its routing channels.
3. Install:
   a. system board
   b. system fan
   c. ExpressCard cage
   d. palmrest
   e. display hinge
   f. WLAN card
   g. hard drive
   h. optical drive
Removing the Speakers

1. Follow the procedures in Before Working Inside Your Computer.

2. Remove:
   a. SD memory card
   b. battery
   c. base cover
   d. keyboard trim
   e. keyboard
   f. memory
   g. optical drive
   h. hard drive
   i. WLAN card
   j. display hinge
   k. palmrest
   l. system fan
   m. ExpressCard cage
   n. system board

3. Perform the following steps:
   a. Remove the speaker cable from the routing channels.
   b. Remove the screws that secure the speakers from the computer.
   c. Lift and remove the speakers from the computer.

Installing the Speakers

1. Place the speakers on the computer.

2. Secure the speaker cable to the routing channels.

3. Tighten the screws to secure the speakers to the computer.

4. Install:
   a. system board
   b. ExpressCard cage
   c. system fan

Follow the procedures in After Working Inside Your Computer.
Removing the LED Board

1. Follow the procedures in *Before Working Inside Your Computer*.

2. Remove:
   a. SD card
   b. battery
   c. base cover
   d. keyboard trim
   e. keyboard
   f. memory
   g. optical drive
   h. hard drive
   i. hard-drive cage
   j. WLAN card
   k. display hinge
   l. palmrest
   m. system fan
   n. ExpressCard cage
   o. system board
   p. speakers

3. Perform the following steps:
   a. Remove the screw that secures the LED cover.
   b. Un-route the LED board cable from its channels.
   c. Remove the screw that secures the LED board and lift to remove the LED board from the computer.
Installing the LED Board

1 Place the LED board on its place on the computer.
2 Connect the LED board cable to its connector.
3 Tighten the screw to secure the LED board on the computer.
4 Place the LED cover on the LED board.
5 Install:
   a speakers
   b system board
   c system fan
   d ExpressCard cage
   e palmrest
   f display hinge
   g WLAN card
   h hard drive
   i optical drive
   j memory
   k keyboard
   l keyboard trim
   m base cover
   n battery
   o SD card
6 Follow the procedures in After Working Inside Your Computer.
System Setup enables you to manage your hardware and specify BIOS level options. From the System Setup, you can:

- Change the NVRAM settings after you add or remove hardware
- View the system hardware configuration
- Enable or disable integrated devices
- Set performance and power management thresholds
- Manage your computer security

Topics:

- Boot Sequence
- Navigation keys
- System Setup Options
- Updating the BIOS in Windows
- System and setup password

**Boot Sequence**

Boot Sequence allows you to bypass the System Setup–defined boot device order and boot directly to a specific device (for example: optical drive or hard drive). During the Power-on Self Test (POST), when the Dell logo appears, you can:

- Access System Setup by pressing F2 key
- Bring up the one-time boot menu by pressing F12 key

The one-time boot menu displays the devices that you can boot from including the diagnostic option. The boot menu options are:

- Removable Drive (if available)
- STXXXX Drive

**NOTE:** XXX denotes the SATA drive number.

- Optical Drive (if available)
- Diagnostics

**NOTE:** Choosing Diagnostics, will display the ePSA diagnostics screen.

The boot sequence screen also displays the option to access the System Setup screen.

**Navigation keys**

**NOTE:** For most of the System Setup options, changes that you make are recorded but do not take effect until you restart the system.

Enter
Selects a value in the selected field (if applicable) or follow the link in the field.

Spacebar
Expands or collapses a drop-down list, if applicable.

Tab
Moves to the next focus area.

NOTE: For the standard graphics browser only.

Esc
Moves to the previous page until you view the main screen. Pressing Esc in the main screen displays a message that prompts you to save any unsaved changes and restarts the system.

System Setup Options

NOTE: Depending on the computer and its installed devices, the items listed in this section may or may not appear.

Table 1. General

<table>
<thead>

</tbody>
</table>
### Table 5. Secure Boot

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Secure Boot Enable</td>
<td>This option enables or disables the Secure Boot Feature.</td>
</tr>
<tr>
<td></td>
<td>• Disable (default)</td>
</tr>
<tr>
<td></td>
<td>• Enable</td>
</tr>
<tr>
<td>Expert Key Management</td>
<td>Allows you to manipulate the security key databases only if the system is in Custom Mode. The Enable Custom Mode option is disabled by default. The options are:</td>
</tr>
<tr>
<td></td>
<td>• PK</td>
</tr>
<tr>
<td></td>
<td>• KEK</td>
</tr>
<tr>
<td></td>
<td>• db</td>
</tr>
<tr>
<td></td>
<td>• dbx</td>
</tr>
</tbody>
</table>

If you enable the **Custom Mode**, the relevant options for **PK, KEK, db, and dbx** appear. The options are:

- **Save to File**: Saves the key to a user-selected file
- **Replace from File**: Replaces the current key with a key from a user-selected file
- **Append from File**: Adds a key to the current database from a user-selected file
- **Delete**: Deletes the selected key
- **Reset All Keys**: Resets to default setting
- **Delete All Keys**: Deletes all the keys

**NOTE**: If you disable the Custom Mode, all the changes made will be erased and the keys will restore to default settings.

### Table 6. Performance

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Multi Core Support</td>
<td>This field specifies whether the process will have one or all cores enabled. The performance of some applications will improve with the additional cores. This option is enabled by default. Allows you to enable or disable multi-core support for the processor. The options are:</td>
</tr>
<tr>
<td></td>
<td>• All</td>
</tr>
<tr>
<td></td>
<td>• 1</td>
</tr>
<tr>
<td></td>
<td>• 2</td>
</tr>
</tbody>
</table>

Default Setting: All

Intel SpeedStep | Allows you to enable or disable the Intel SpeedStep feature. Default Setting: Enable Intel SpeedStep

C States Control | Allows you to enable or disable the additional processor sleep states. Default Setting: The option C states is enabled.

Intel TurboBoost | Allows you to enable or disable the Intel TurboBoost mode of the processor. Default Setting: Enable Intel TurboBoost
### Table 7. Power Management

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Hyper-Thread Control</td>
<td>Allows you to enable or disable the HyperThreading in the processor. Default Setting: Enabled</td>
</tr>
<tr>
<td>Rapid Start Technology</td>
<td>This option might improve the battery life by automatically putting the computer in to a low power state during Sleep, after a user-specified amount of time. Default Setting: Disabled</td>
</tr>
</tbody>
</table>

**NOTE**: This feature is only functional when the AC power adapter is connected. If the AC power adapter is removed during Standby, the system setup will remove power from all of the USB ports to conserve battery power.

- Enable USB Wake Support
- Disable USB Wake Support is not selected

<table>
<thead>
<tr>
<th>AC Behavior</th>
<th>Allows you to enable or disable the computer from turning on automatically when an AC adapter is connected. Default Setting: Wake on AC is not selected.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Auto On Time</td>
<td>Allows you to set the time at which the computer must turn on automatically. The options are:</td>
</tr>
<tr>
<td></td>
<td>- Disabled <em>(default)</em></td>
</tr>
<tr>
<td></td>
<td>- Every Day</td>
</tr>
<tr>
<td></td>
<td>- Weekdays</td>
</tr>
<tr>
<td></td>
<td>- Select Days</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>USB Wake Support</th>
<th>Allows you to enable USB devices to wake the system from Standby.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Wireless Radio Control</td>
<td>Allows you to enable or disable the feature that automatically switches from wired or wireless networks without depending on the physical connection.</td>
</tr>
<tr>
<td></td>
<td>- Control WLAN Radio</td>
</tr>
<tr>
<td></td>
<td>- Control WWAN Radio</td>
</tr>
<tr>
<td></td>
<td>- Control WLAN radio or Control WWAN radio is not selected <em>(default)</em></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Wake on LAN/WLAN</th>
<th>Allows you to enable or disable the feature that powers on the computer from the Off state when triggered by a LAN signal.</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>- Disabled: This option is enabled by default</td>
</tr>
<tr>
<td></td>
<td>- LAN Only</td>
</tr>
<tr>
<td></td>
<td>- WLAN Only</td>
</tr>
<tr>
<td></td>
<td>- LAN or WLAN</td>
</tr>
<tr>
<td></td>
<td>- LAN with PXE Boot</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Block Sleep</th>
<th>This option lets you block entering to sleep (S3 state) in Operating System environment. Block Sleep (S3 state) - This option is disabled by default.</th>
</tr>
</thead>
</table>

| Peak Shift           | This option enables you to minimize the AC power consumption during the peak power times of day. After you enable this option, your system runs only in battery even if the AC is attached. |
Advanced Battery Charge Configuration
This option enables you to maximize the battery health. By enabling this option, your system uses the standard charging algorithm and other techniques, during the non-work hours to improve the battery health.
Disabled (default)

Primary Battery Charge Configuration
Allows you to select the charging mode for the battery. The options are:
- Adaptive
- Standard
- ExpressCharge: This option is enabled by default.
- Primarily AC use
- Custom

If Custom Charge is selected, you can also configure Custom Charge Start and Custom Charge Stop.

NOTE: All charging mode may not be available for all the batteries. To enable this option, disable the Advanced Battery Charge Configuration option.

Battery Slice Charge Configuration
Allows you to select the type of charge for the battery. The options are:
- Standard Charge
- Express Charge: This option is enabled by default.

NOTE: Express charge may not be available for all the batteries. To enable this option, disable the Advanced Battery Charge Configuration option.

Intel Smart Connect Technology
This option, if enabled, periodically senses the nearby wireless connections, while the system is in sleep state. You can use this option to synchronize the email or other social media application that are open, when the system enters the sleep state.

Table 8. POST Behavior

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Adapter Warnings</td>
<td>Allows you to enable or disable the system setup (BIOS) warning messages when you use certain power adapters. Default Setting: Enable Adapter Warnings</td>
</tr>
<tr>
<td>Keypad (Embedded)</td>
<td>Allows you to choose one of two methods to enable the keypad that is embedded in the internal keyboard.</td>
</tr>
<tr>
<td></td>
<td>- Fn Key Only: This option is enabled by default.</td>
</tr>
<tr>
<td></td>
<td>- By Numlock</td>
</tr>
<tr>
<td></td>
<td>NOTE: The Keyboard (Embedded) option is not supported in Latitude E5540</td>
</tr>
<tr>
<td>Mouse/Touchpad</td>
<td>Allows you to define how the system handles mouse and touch pad input. The options are:</td>
</tr>
<tr>
<td></td>
<td>- Serial Mouse</td>
</tr>
<tr>
<td></td>
<td>- PS2 Mouse</td>
</tr>
<tr>
<td></td>
<td>- Touchpad/PS-2 Mouse: This option is enabled by default.</td>

<td>Allows you to enable the Numlock option when the computer boots. Enable Network (default)</td>
</tr>
<tr>
<td>Option</td>
<td>Description</td>
</tr>
<tr>
<td>------------------------</td>
<td>---------------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>Fn Key Emulation</td>
<td>Allows you to set the option where the <code>&lt;Scroll Lock&gt;</code> key is used to simulate the <code>&lt;Fn&gt;</code> key feature.</td>
</tr>
<tr>
<td></td>
<td>Enable Fn Key Emulation (default)</td>
</tr>
<tr>
<td>Mebx Hotkey</td>
<td>Allows you to specify whether the MEBx Hotkey function should be enabled when the system boots</td>
</tr>
<tr>
<td></td>
<td>Enable MEBx Hotkey (default)</td>
</tr>
<tr>
<td>Fastboot</td>
<td>Allows you to speed up the boot process by bypassing some of the compatibility steps. The options are:</td>
</tr>
<tr>
<td></td>
<td>• Minimal</td>
</tr>
<tr>
<td></td>
<td>• Thorough (default)</td>
</tr>
<tr>
<td></td>
<td>• Auto</td>
</tr>
<tr>
<td>Extended BIOS POST Time</td>
<td>Allows you to create an additional pre-boot delay. The options are:</td>
</tr>
<tr>
<td></td>
<td>• 0 seconds</td>
</tr>
<tr>
<td></td>
<td>• 5 seconds (default)</td>
</tr>
<tr>
<td></td>
<td>• 10 seconds</td>
</tr>
</tbody>
</table>

</table>

### Updating the BIOS in Windows

It is recommended to update your BIOS (System Setup), on replacing the system board or if an update is available. For laptops, ensure that your computer battery is fully charged and connected to a power outlet.

**NOTE:** If BitLocker is enabled, it must be suspended prior to updating the system BIOS, and then re-enabled after the BIOS update is completed.

1. Restart the computer.
2. Go to Dell.com/support.
   - Enter the Service Tag or Express Service Code and click Submit.
   - Click Detect Product and follow the instructions on screen.
3. If you are unable to detect or find the Service Tag, click the Choose from all products.
4. Choose the Products category from the list.
   - **NOTE:** Choose the appropriate category to reach the product page
5. Select your computer model and the Product Support page of your computer appears.
6. Click Get drivers and click Drivers and Downloads.
   The Drivers and Downloads section opens.
Click Find it myself.

Click BIOS to view the BIOS versions.

Identify the latest BIOS file and click Download.

Select your preferred download method in the Please select your download method below window, click Download File.

File Download window appears.

Click Save to save the file on your computer.

Click Run to install the updated BIOS settings on your computer.

Follow the instructions on the screen.

NOTE: It is recommended not to update the BIOS version for more than 3 revisions. For example: If you want to update the BIOS from 1.0 to 7.0, then install version 4.0 first and then install version 7.0.

System and setup password

You can create a system password and a setup password to secure your computer.

<table>
<thead>
<tr>
<th>Password type</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>System password</td>
<td>Password that you must enter to log on to your system.</td>
</tr>
<tr>
<td>Setup password</td>
<td>Password that you must enter to access and make changes to the BIOS settings of your computer.</td>
</tr>
</tbody>
</table>

CAUTION: The password features provide a basic level of security for the data on your computer.

CAUTION: Anyone can access the data stored on your computer if it is not locked and left unattended.

NOTE: Your computer is shipped with the system and setup password feature disabled.

Assigning a system password and setup password

You can assign a new System Password only when the status is in Not Set.

To enter the system setup, press F2 immediately after a power-on or re-boot.

1 In the System BIOS or System Setup screen, select Security and press Enter. The Security screen is displayed.

2 Select System Password and create a password in the Enter the new password field.

Use the following guidelines to assign the system password:

- A password can have up to 32 characters.
- The password can contain the numbers 0 through 9.
- Only lower case letters are valid, upper case letters are not allowed.
- Only the following special characters are allowed: space, (.), (+), (-), (.), (/), (;), ([), (]), (`).

3 Type the system password that you entered earlier in the Confirm new password field and click OK.

4 Press Esc and a message prompts you to save the changes.

5 Press Y to save the changes.

The computer reboots.

Deleting or changing an existing system and/or setup password

Ensure that the Password Status is Unlocked (in the System Setup) before attempting to delete or change the existing System and/or Setup password. You cannot delete or change an existing System or Setup password, if the Password Status is Locked.
To enter the System Setup, press F2 immediately after a power-on or reboot.

1. In the **System BIOS** or **System Setup** screen, select **System Security** and press Enter. The **System Security** screen is displayed.
2. In the **System Security** screen, verify that **Password Status** is **Unlocked**.
3. Select **System Password**, alter or delete the existing system password and press Enter or Tab.
4. Select **Setup Password**, alter or delete the existing setup password and press Enter or Tab.
   
   **NOTE:** If you change the System and/or Setup password, re-enter the new password when promoted. If you delete the System and/or Setup password, confirm the deletion when promoted.
5. Press Esc and a message prompts you to save the changes.
6. Press Y to save the changes and exit from System Setup.
   The computer reboots.
If you experience a problem with your computer, run the ePSA diagnostics before contacting Dell for technical assistance. The purpose of running diagnostics is to test your computer's hardware without requiring additional equipment or risking data loss. If you are unable to fix the problem yourself, service and support personnel can use the diagnostics results to help you solve the problem.

Topics:

- Enhanced Pre-Boot System Assessment (ePSA) diagnostics
- Device status lights
- Battery status lights

**Enhanced Pre-Boot System Assessment (ePSA) diagnostics**

The ePSA diagnostics (also known as system diagnostics) performs a complete check of your hardware. The ePSA is embedded with the BIOS and is launched by the BIOS internally. The embedded system diagnostics provides a set of options for particular devices or device groups allowing you to:

- Run tests automatically or in an interactive mode
- Repeat tests
- Display or save test results
- Run thorough tests to introduce additional test options to provide extra information about the failed device(s)
- View status messages that inform you if tests are completed successfully
- View error messages that inform you of problems encountered during testing

⚠️ **CAUTION:** Use the system diagnostics to test only your computer. Using this program with other computers may cause invalid results or error messages.

ℹ️ **NOTE:** Some tests for specific devices require user interaction. Always ensure that you are present at the computer terminal when the diagnostic tests are performed.

**Device status lights**

<table>
<thead>
<tr>
<th>Icon</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>🔥</td>
<td>Turns on when you turn on the computer and blinks when the computer is in a power management mode.</td>
</tr>
<tr>
<td>🌋</td>
<td>Turns on when the computer reads or writes data.</td>
</tr>
<tr>
<td>🍒</td>
<td>Turns on steadily or blinks to indicate battery charge status.</td>
</tr>
<tr>
<td>🌌</td>
<td>Turns on when wireless networking is enabled.</td>
</tr>
</tbody>
</table>

**Battery status lights**

If the computer is connected to an electrical outlet, the battery light operates as follows:
<table>
<thead>
<tr>
<th>Light Status</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Alternately blinking amber light and white light</td>
<td>An unauthenticated or unsupported non-Dell AC adapter is attached to your laptop.</td>
</tr>
<tr>
<td>Alternately blinking amber light with steady white light</td>
<td>Temporary battery failure with AC adapter present.</td>
</tr>
<tr>
<td>Constantly blinking amber light</td>
<td>Fatal battery failure with AC adapter present.</td>
</tr>
<tr>
<td>Light off</td>
<td>Battery in full charge mode with AC adapter present.</td>
</tr>
<tr>
<td>White light on</td>
<td>Battery in charge mode with AC adapter present.</td>
</tr>
</tbody>
</table>
NOTE: Offerings may vary by region. For more information regarding the configuration of your computer, click Start (Start icon) > Help and Support, and then select the option to view information about your computer.

</table>
### Feature Specifications

**Life span**: 300 discharge/charge cycles

**Voltage**
- **4-cell**: 14.8 VDC
- **6- and 9-cell**: 11.1 VDC

**Life span**: 300 discharge/charge cycles

**Temperature range**:
- **Operating**: 0 °C to 50 °C (32 °F to 122 °F)
- **Non-Operating**: −40 °C to 85 °C (−40 °F to 185 °F)

**NOTE**: The battery pack is capable of safely withstanding the above storage temperatures with 100% charge.

**NOTE**: The battery pack is also capable of withstanding storage temperatures from −20 °C to +60 °C with no degradation in its performance.

**Coin-cell battery**: 3 V CR2032 lithium coin cell

NOTE: If you do not have an active Internet connection, you can find contact information on your purchase invoice, packing slip, bill, or Dell product catalog.

Dell provides several online and telephone-based support and service options. Availability varies by country and product, and some services may not be available in your area. To contact Dell for sales, technical support, or customer service issues:

1. Go to Dell.com/support.
2. Select your support category.
3. Verify your country or region in the Choose a Country/Region drop-down list at the bottom of the page.
4. Select the appropriate service or support link based on your need.
