Notes, Cautions, and Warnings

**NOTE:** A NOTE indicates important information that helps you make better use of your computer.

**CAUTION:** A CAUTION indicates either potential damage to hardware or loss of data and tells you how to avoid the problem.

**NOTE:** A WARNING indicates a potential for property damage, personal injury, or death.

Before Working Inside Your Computer

Use the following safety guidelines to help protect your computer from potential damage and to help to ensure your personal safety.

Unless otherwise noted, each procedure included in this document assumes that the following conditions exist:

- You have read the safety information that shipped with your computer.
- A component can be replaced or—if purchased separately—installed by performing the removal procedure in reverse order.

**NOTE:** Before working inside your computer, read the safety information that shipped with your computer. For additional safety best practices information, see the Regulatory Compliance Homepage at [www.dell.com/regulatory_compliance](http://www.dell.com/regulatory_compliance)

**CAUTION:** Many repairs may only be done by a certified service technician. You should only perform troubleshooting and simple repairs as authorized in your product documentation, or as directed by the online or telephone service and support team. Damage due to servicing that is not authorized by Dell is not covered by your warranty. Read and follow the safety instructions that came with the product.

**CAUTION:** To avoid electrostatic discharge, ground yourself by using a wrist grounding strap or by periodically touching an unpainted metal surface, such as a connector on the back of the computer.

**CAUTION:** Handle components and cards with care. Do not touch the components or contacts on a card. Hold a card by its edges or by its metal mounting bracket. Hold a component such as a processor by its edges, not by its pins.

**CAUTION:** When you disconnect a cable, pull on its connector or on its pull-tab, not on the cable itself. Some cables have connectors with locking tabs; if you are disconnecting this type of cable, press in on the locking tabs before you disconnect the cable. As you pull connectors apart, keep them evenly aligned to avoid bending any connector pins. Also, before you connect a cable, ensure that both connectors are correctly oriented and aligned.

**NOTE:** The color of your computer and certain components may appear differently than shown in this document.

To avoid damaging your computer, perform the following steps before you begin working inside the computer.

1. Ensure that your work surface is flat and clean to prevent the computer cover from being scratched.
2. Turn off your computer (see Turning Off Your Computer).
3. If the computer is connected to a docking device (docked) such as the optional Media Base or Battery Slice, undock it.

**CAUTION:** To disconnect a network cable, first unplug the cable from your computer and then unplug the cable from the network device.

4. Disconnect all network cables from the computer.
5. Disconnect your computer and all attached devices from their electrical outlets.
6. Close the display and turn the computer upside-down on a flat work surface.

**NOTE:** To avoid damaging the system board, you must remove the main battery before you service the computer.

7. Remove the main battery.
8. Turn the computer top-side up.
9. Open the display.
10. Press the power button to ground the system board.

⚠️ **CAUTION:** To guard against electrical shock, always unplug your computer from the electrical outlet before opening the display.

⚠️ **CAUTION:** Before touching anything inside your computer, ground yourself by touching an unpainted metal surface, such as the metal at the back of the computer. While you work, periodically touch an unpainted metal surface to dissipate static electricity, which could harm internal components.

11. Remove any installed ExpressCards or Smart Cards from the appropriate slots.

---

**Recommended Tools**

The procedures in this document may require the following tools:

- Small flat-blade screwdriver
- #0 Phillips screwdriver
- #1 Phillips screwdriver
- Small plastic scribe

---

**Turning Off Your Computer**

⚠️ **CAUTION:** To avoid losing data, save and close all open files and exit all open programs before you turn off your computer.

1. Shut down the operating system:
   - In Windows 8:
     - Using a touch-enabled device:
       a. Swipe in from the right edge of the screen, opening the Charms menu and select **Settings**.
       b. Select the and then select **Shut down**
     - Using a mouse:
       a. Point to upper-right corner of the screen and click **Settings**.
       b. Click the and select **Shut down**.
   - In Windows 7:
     a. Click **Start**
     b. Click **Shut Down**.
     or
     a. Click **Start**
     b. Click the arrow in the lower-right corner of the **Start** menu as shown below, and then click **Shut Down**.

2. Ensure that the computer and all attached devices are turned off. If your computer and attached devices did not automatically turn off when you shut down your operating system, press and hold the power button for about 4 seconds to turn them off.

---

**After Working Inside Your Computer**

After you complete any replacement procedure, ensure you connect any external devices, cards, and cables before turning on your computer.

⚠️ **CAUTION:** To avoid damage to the computer, use only the battery designed for this particular Dell computer. Do not use batteries designed for other Dell computers.

1. Connect any external devices, such as a port replicator, battery slice, or media base, and replace any cards, such as an ExpressCard.
2. Connect any telephone or network cables to your computer.
To connect a network cable, first plug the cable into the network device and then plug it into the computer.

3. Replace the battery.
4. Connect your computer and all attached devices to their electrical outlets.
5. Turn on your computer.
Removing the Secure Digital (SD) Card

1. Follow the procedures in Before Working Inside Your Computer.
2. Press in on the SD card to release it from the computer. Slide the SD card out of the computer.

Installing the SD Card

1. Push in the SD card into its slot until it clicks into place.
2. Follow the procedures in After Working Inside Your Computer.

Removing the ExpressCard

1. Follow the procedures in Before Working Inside Your Computer.
2. Press in on the ExpressCard to release it from the computer. Slide the ExpressCard out of the computer.

Installing the ExpressCard

1. Slide the ExpressCard into its slot until it clicks into place.
2. Follow the procedures in After Working Inside Your Computer.

Removing the Battery

1. Follow the procedures in Before Working Inside Your Computer.
2. Slide the release latch to unlock the battery.
3. Flip and remove the battery from the computer.

**Installing the Battery**

1. Slide the battery into its slot until it clicks into place.
2. Follow the procedures in *After Working Inside Your Computer*.

**Removing the Subscriber Identity Module (SIM) Card**

1. Follow the procedures in *Before Working Inside Your Computer*.
2. Remove the battery.
3. Slide the SIM card out from the slot.
Installing the Subscriber Identity Module (SIM) Card

1. Push in the SIM card into its slot.
2. Install the battery.
3. Follow the procedures in After Working Inside Your Computer.

Removing the Base Cover

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove the battery.
3. Remove the screws that secure the base cover to the computer. Press the rubber tabs towards the rear of the computer to disengage the base cover.
4. Flip and remove the base cover from the computer.

Installing the Base Cover
1. Slide in and place the base cover to align with the screw holes correctly on the computer.
2. Tighten the screws to secure the base cover to the computer.
3. Install the battery.
4. Follow the procedures in After Working Inside Your Computer.

Removing the Keyboard Trim
1. Follow the procedures in Before Working Inside Your Computer.
2. Remove the battery.
3. Pry up the keyboard trim starting from the top-inner edge.
4. Pry up the bottom edge of the keyboard trim from the top-inner edge.

**Installing the Keyboard Trim**

1. Toe-in the keyboard trim from the front and align it to its original position on the computer. Ensure that the hard-tab on the left corner snaps into place.
2. Press along the sides of the keyboard trim until it snaps in place.
3. Install the battery.
4. Follow the procedures in After Working Inside Your Computer.

Removing the Keyboard

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove the:
   a) battery
   b) keyboard trim
3. Remove the screws that secure the keyboard to the computer.
4. Starting from the bottom of the keyboard, separate the keyboard from the computer and flip the keyboard over.

5. Disconnect the keyboard-data cable from the system board and remove the keyboard.
Installing the Keyboard

1. Connect the keyboard-data cable to the system board.
   
   **NOTE:** Ensure that you fold the keyboard-data cable in perfect alignment.

2. Press the keyboard in its compartment.

3. Tighten the screws to secure the keyboard to the computer.

4. Press over the cross section of the following keys to secure the keyboard to the computer:
   
   a) `<R>`, `<T>`, `<F>`, and `<G>` keys
   b) over the `<9>` key
   c) NUMLOCK `<9>` key
5. Install the:
   a) keyboard trim
   b) battery
6. Follow the procedures in *After Working Inside Your Computer*.

**Removing the Primary Memory**

1. Follow the procedures in *Before Working Inside Your Computer*.
2. Remove the:
   a) battery
   b) base cover
3. Pry the retention clips away from the primary memory until it pops up. Lift the primary memory and remove it from the computer.

**Installing the Primary Memory**

1. Insert the primary memory into the memory socket.
2. Press the clips to secure the primary memory to the system board.
3. Install the:
   a) base cover
   b) battery
4. Follow the procedures in *After Working Inside Your Computer*.

**Removing the Secondary Memory**

1. Follow the procedures in *Before Working Inside Your Computer*. 
2. Remove the:
   a) battery
   b) keyboard trim
   c) keyboard

   **NOTE:** The secondary memory is located below the keyboard.

3. Pry the retention clips away from the memory module until it pops up. Lift up the memory module and remove it from the computer.

### Installing the Secondary Memory

1. Insert the secondary memory into the memory socket.
2. Press the clips to secure the memory module to the system board.
3. Install the:
   a) keyboard
   b) keyboard trim
   c) battery
4. Follow the procedures in *After Working Inside Your Computer*.

### Removing the Optical Drive

1. Follow the procedures in *Before Working Inside Your Computer*.
2. Remove the:
   a) battery
   b) base cover
3. Remove the screw that secures the optical drive to the computer.
4. Pry and slide out the optical drive to remove it from the computer.
5. Remove the screws that secure the drive-latch bracket to the optical drive and remove the bracket.

**Installing the Optical Drive**

1. Tighten the screws to secure the drive-latch bracket to the optical drive.
2. Slide the optical drive into its slot and tighten the screw to secure the optical drive to the computer.
3. Install the:
   a) battery
   b) base cover
4. Follow the procedures in *After Working Inside Your Computer*.

**Removing the Hard Drive**

1. Follow the procedures in *Before Working Inside Your Computer*.
2. Remove the:
   a) battery
   b) base cover
3. Remove the screws that secure the hard drive to the computer. Slide the hard-drive latch to the unlock position and pull out the hard drive from the computer.

4. Flex the hard-drive bracket outward and pull out the hard drive from the bracket.

**NOTE:** A rubber filler is installed to the hard-drive bracket for 7 mm hard drives. It is designed to prevent vibrations and for correct installation of the 7 mm hard drives. 9 mm hard drives do not require the filler when installed into the hard-drive bracket.

### Installing the Hard Drive

1. Engage the hard-drive bracket to the hard drive.
2. Insert the hard drive into its slot in the computer till it clicks in place.
3. Tighten the screws to secure the hard drive to the computer.
4. Install the:
   a) base cover
   b) battery
5. Follow the procedures in *After Working Inside Your Computer*. 

20 卸下和安装元件
Removing the Wireless Local Area Network (WLAN) Card

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove the:
   a) battery
   b) base cover
3. Disconnect and un-route the antenna cables connected to the WLAN card. Remove the screw that secures the WLAN card to the computer. Remove the WLAN card from the computer.

Installing the Wireless Local Area Network (WLAN) Card

1. Insert the WLAN card in its slot in the computer.
2. Tighten the screw to secure the WLAN card to the computer.
3. Route through the routing channel and connect them to the WLAN card.
4. Install the:
   a) base cover
   b) battery
5. Follow the procedures in After Working Inside Your Computer.

Removing Wireless Wide Area Network (WWAN) Card (Optional)

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove the:
   a) battery
   b) base cover
3. Disconnect and un-route and remove the antenna cables connected to the WWAN card. Remove the screw that secures the WWAN card to the computer. Remove the WWAN card from the computer.

**NOTE:** The location of the WWAN card may vary from what is displayed in the illustrations.
Installing the Wireless Wide Area Network (WWAN) Card (Optional)

1. Slide the WWAN card in the WWAN card slot.
2. Tighten the screw to secure the WWAN card to the computer.
3. Route the cables through the routing channels and connect them to the WWAN card.
4. Install the:
   a) base cover
   b) battery
5. Follow the procedures in After Working Inside Your Computer.

Removing the Bluetooth Module

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove the:
   a) battery
   b) base cover
3. Disconnect and un-route the bluetooth cable. Slide the bluetooth door upward to release it.
4. Remove the bluetooth module from the computer. Remove the screw that secures the bluetooth module in place.
5. Remove the bluetooth module. Disconnect and remove the bluetooth cable from the module.
Installing the Bluetooth Module

1. Connect the bluetooth cable to the bluetooth module.
2. Tighten the screw to secure the bluetooth module in place.
3. Insert the bluetooth module in its slot and press down the bluetooth door.
4. Route and connect the bluetooth cable.
5. Install the:
   a) base cover
   b) battery
6. Follow the procedures in After Working Inside Your Computer.

Removing the Processor Fan

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove the:
   a) battery
   b) base cover
3. Remove the screws that secure the processor fan to the computer. Remove the processor fan from the computer.
4. Disconnect the processor-fan cable.
Installing the Processor Fan

1. Connect the processor-fan cable.
2. Insert the processor fan into its slot in the computer.
3. Tighten the screws that secure the processor fan to the computer.
4. Install the:
   a) base cover
   b) battery
5. Follow the procedures in After Working Inside Your Computer.

Removing the Video-Card Fan

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove the:
   a) battery
   b) base cover
3. Remove the screws that secure the video-card fan to the computer. Remove the video-card fan from the computer. Disconnect the video-card fan cable.

Installing the Video-Card Fan

1. Connect the video-card fan cable.
2. Insert the video-card fan into its slot and tighten the screws to secure it to the computer.
3. Install the:
   a) base cover
   b) battery
4. Follow the procedures in After Working Inside Your Computer.

## Removing the Coin-Cell Battery

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove the:
   a) battery
   b) base cover
3. Disconnect the coin-cell battery cable. Pry the coin-cell battery upward and remove it from the computer.

## Installing the Coin-Cell Battery

1. Replace the coin-cell battery in its slot in the computer.
2. Connect the coin-cell battery cable.
3. Install the:
   a) base cover
   b) battery
4. Follow the procedures in After Working Inside Your Computer.

## Removing the Palmrest

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove the:
   a) battery
   b) base cover
   c) keyboard trim
   d) keyboard
   e) optical drive
   f) hard drive drive
3. Disconnect the RFID and fingerprint reader cables
4. Remove the screws that secure the palmrest to the base of the computer.

5. Flip the computer and disconnect the following cables from the system board:
   a) media board
   b) speaker
   c) touchpad
   d) power button
6. Remove the screws that secure the palmrest to the computer and flip it over from the edge.

7. Flip and remove the palmrest from the computer.
Installing the Palmrest

1. Toe-in the palmrest from the front and align it to its original position on the computer.

2. Press on the positions indicated until it snaps in place.
3. Connect the following cables to the system board:
   a) power button  
   b) touchpad  
   c) speaker  
   d) media board  
   e) fingerprint  
   f) RFID

4. Tighten the screws to secure the palmrest to the front of the computer.

5. Tighten the screws to secure the palmrest to the base of the computer.

6. Install the:
   a) hard drive  
   b) optical drive  
   c) keyboard  
   d) keyboard trim  
   e) base cover  
   f) battery

7. Follow the procedures in After Working Inside Your Computer.

---

Removing the ExpressCard Module

1. Follow the procedures in Before Working Inside Your Computer.

2. Remove the:
   a) ExpressCard  
   b) battery  
   c) base cover  
   d) keyboard trim  
   e) keyboard  
   f) optical drive  
   g) hard drive  
   h) palm rest

3. Disconnect the :
   a) ExpressCard cable from the system board  
   b) the USH board cable from the USH board (M4700 only)
4. Remove the screws that secure the ExpressCard module to the computer and remove the ExpressCard module.

Installing the ExpressCard Module

1. Insert the ExpressCard module into its compartment.
2. Tighten the screws to secure the ExpressCard module to the computer
3. Connect the:
   a) ExpressCard cable to the system board
   b) the USH board cable to the USH board (for M4700 only)
4. Install the:
   a) palm rest
   b) hard drive
   c) optical drive
   d) keyboard
   e) keyboard trim
   f) base cover
   g) battery
   h) ExpressCard
5. Follow the procedures in After Working Inside Your Computer.

Removing The Heat Sink

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove the:
   a) battery
   b) base cover
3. Loosen the captive screws that secure the heat sink to the computer. Lift up and remove the heat sink from the computer.

**Installing the Heat Sink**

1. Replace the heat sink in its slot. Tighten the captive screws to secure the heat sink to the computer.
2. Install the:
   a) processor fan
   b) palm rest
   c) hard drive
   d) optical drive
   e) keyboard
   f) keyboard trim
   g) base cover
   h) battery
3. Follow the procedures in After Working Inside Your Computer.

**Removing the Processor**

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove the:
   a) battery
   b) base cover
   c) keyboard trim
   d) keyboard
   e) optical drive
   f) hard drive
   g) palm rest
   h) processor fan
   i) heat sink
3. Rotate the processor cam lock in a counter-clockwise direction. Remove the processor from the computer.
Installing the Processor

1. Align the notches on the processor and the socket, and insert the processor into the socket.
2. Rotate the processor cam lock in a clockwise direction.
3. Install the:
   a) heat sink
   b) processor fan
   c) palm rest
   d) hard drive
   e) optical drive
   f) keyboard
   g) keyboard trim
   h) base cover
   i) battery
4. Follow the procedures in After Working Inside Your Computer.

Removing the Video-Card Heat Sink

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove the:
   a) battery
   b) bottom door
   c) keyboard trim
   d) keyboard
   e) optical drive
   f) hard drive
   g) palm rest
   h) video fan
3. Disconnect and un-route any antenna cables connected to installed wireless cards.
4. Remove the antenna cables from the routing channels.

5. Loosen the captive screws on the heat sink.

6. Remove the video-card heat sink from the computer.
Installing the Video-Card Heat Sink

1. Slide the heat sink into its original position in the computer.
2. Tighten the captive screws to secure the heat sink.
3. Route and connect the antenna cables to the installed wireless cards.
4. Install the:
   a) video fan
   b) palm rest
   c) hard drive
   d) optical drive
   e) keyboard
   f) keyboard trim
   g) bottom door
   h) battery
5. Follow the procedures in After Working Inside Your Computer.

Removing the Video Card

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove the:
   a) battery
   b) base cover
   c) keyboard trim
   d) keyboard
   e) optical drive
   f) hard drive
   g) palm rest
   h) video-card fan
   i) video-card heat sink
   j) heatsink
3. Remove the screws that secure the video card to the computer. Remove the video card from the computer.

Installing the Video Card

1. Insert the video card into its slot in the computer.
2. Tighten the screws to secure it to the computer.
3. Install the:
   a) heatsink
   b) video-card heat sink
   c) video-card fan
   d) palm rest
   e) hard drive
Removing the Input/Output (I/O) Board

1. Follow the procedures in Before Working Inside Your Computer.

2. Remove the:
   a) SD card
   b) battery
   c) base cover
   d) keyboard trim
   e) keyboard
   f) optical drive
   g) hard drive
   h) palmrest

3. Disconnect the ExpressCard module connector from the I/O board.

4. Remove the screw that secures the I/O board to the computer. Lift the right edge of the I/O board upwards to disengage the connector and remove it from computer.
Installing the I/O Board

1. Connect the I/O board connector and slide the I/O board into its slot in the computer.
2. Tighten the screw to secure the I/O board to the computer.
3. Connect the ExpressCard module connector to the I/O board.
4. Install the:
   a) palmrest
   b) hard drive
   c) optical drive
   d) keyboard
   e) keyboard trim
   f) base cover
   g) battery
   h) SD card
5. Follow the procedures in After Working Inside Your Computer.

Removing the Switch Board

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove the:
   a) battery
   b) base cover
   c) keyboard trim
   d) keyboard
   e) optical drive
   f) hard drive
   g) palmrest
3. Disconnect the switch-board cable from the system board and remove it from the latches. Remove the screws that secure the switch board to the computer and remove it from the computer.
Installing the Switch Board

1. Align the switch board to its original position on the computer.
2. Tighten the screws to secure the switch board to the computer.
3. Connect the switch-board cable to the system board and secure it through the routing channel.
4. Install the:
   a) palmrest
   b) hard drive
   c) optical drive
   d) keyboard
   e) keyboard trim
   f) base cover
   g) battery
5. Follow the procedures in After Working Inside Your Computer.

Removing the Unified Security Hub (USH) Board

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove the:
   a) battery
   b) base cover
   c) keyboard trim
   d) keyboard
   e) optical drive
   f) hard drive
   g) palmrest
3. Disconnect the smart-card and the USH cable from the system board. Remove the screws that secure the USH board to the computer and remove it from the computer.
Installing the USH Board

1. Align the USH board to its original position on the computer.
2. Tighten the screws to secure the USH board to the computer.
3. Connect the smart-card and the USH board cables to the system board.
4. Install the:
   a) palmrest
   b) hard drive
   c) optical drive
   d) keyboard
   e) keyboard trim
   f) base cover
   g) battery
5. Follow the procedures in After Working Inside Your Computer.

Removing the Display Assembly

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove the:
   a) battery
   b) base cover
   c) keyboard trim
   d) keyboard
   e) optical drive
   f) hard drive
   g) palmrest
3. Disconnect the antenna cables from the wireless cards, and push them down the routing hole.
4. Flip the computer and pull up the antenna cables through the routing hole.
5. Flip the computer and remove the screws from the bottom and back of the computer.

6. Remove the screws that secure the low-voltage differential signalling (LVDS) cable bracket. Remove the LVDS cable bracket and disconnect the LVDS cable and camera cable from the system board.

**NOTE:** LVDS cable is available in M4700 without the bracket. LVDS cable bracket is available only in M6700.
7. Remove the screws that secure the display assembly to the computer. Remove the display assembly from the computer.

Installing the Display Assembly

1. Tighten the screws to secure the display assembly in place.
2. Connect the camera and LVDS cables to the correct connectors on the system board.
3. Place the LVDS cable bracket on the computer and tighten the screws to secure it to the computer.

**NOTE:** LVDS cable is available in M4700 without the bracket. LVDS cable bracket is available only in M6700.

4. Route the cables through the routing channels.
5. Insert the wireless antenna cables through the routing hole on the chassis.
6. Tighten the screws at the bottom and back of the computer.
7. Route and connect the antenna cables to their connectors.
8. Install the:
   a) palmrest
   b) hard drive
   c) optical drive
   d) keyboard
   e) keyboard trim
   f) base cover
   g) battery

## Removing the Hinge Cover

1. Follow the procedures in *Before Working Inside Your Computer.*
2. Remove the:
   a) battery
   b) base cover
   c) keyboard trim
   d) keyboard
   e) optical drive
   f) hard drive
   g) palmrest
   h) display assembly
3. Remove the screws that secure the hinge cover to the computer. Remove the hinge cover from the computer.

## Installing the Hinge Cover

1. Place the hinge cover in its position on the computer.
2. Tighten the screws to secure the hinge cover to the computer.
3. Install the:
   a) display assembly
   b) palmrest
   c) hard drive
   d) optical drive
   e) keyboard
   f) keyboard trim
   g) base cover
   h) battery
4. Follow the procedures in *After Working Inside Your Computer.*
Removing the System Board

1. Follow the procedures in Before Working Inside Your Computer.

2. Remove the:
   a) SD card
   b) ExpressCard
   c) battery
   d) base cover
   e) keyboard trim
   f) keyboard
   g) optical drive
   h) hard drive
   i) primary memory
   j) secondary memory
   k) processor fan
   l) video-card fan
   m) palmrest
   n) heat sink
   o) processor
   p) video-card heat sink
   q) video card
   r) I/O board
   s) display assembly

3. Disconnect the coin-cell battery cable.

4. Disconnect the bluetooth cable.

5. Disconnect the USH connector cable.
6. Disconnect the USH cable.
7. Disconnect the wireless cable.
8. Remove all mini-cards (if available).
9. Remove the screws that secure the system board in place and lift the top edge of the system board to a 20° angle.

10. Disconnect the power connector cable and remove the system board.
Installing the System Board

1. Connect the power connector cable to the system board.
2. Place the system board in its compartment.
3. Tighten the screws to secure the system board to the computer.
4. Connect the following cables:
   a) USH connector
   b) bluetooth
   c) wireless board connectors
   d) coin-cell battery
5. Install the wireless cards (if available).
6. Install the:
   a) display assembly
   b) I/O board
   c) video card
   d) video-card heat sink
   e) processor
   f) heat sink
   g) palmrest
   h) video-card fan
   i) processor fan
   j) secondary memory
   k) primary memory
   l) hard drive
   m) optical drive
   n) keyboard
   o) keyboard trim
   p) base cover
   q) battery
   r) ExpressCard
   s) SD card
7. Follow the procedures in After Working Inside Your Computer.
Removing the Power-Connector Port

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove the:
   a) SD card  
   b) ExpressCard  
   c) battery  
   d) base cover  
   e) keyboard trim  
   f) keyboard  
   g) optical drive  
   h) hard drive  
   i) primary memory  
   j) secondary memory  
   k) processor fan  
   l) video-card fan  
   m) palm rest  
   n) processor heatsink  
   o) processor  
   p) video-card heatsink  
   q) video card  
   r) I/O board  
   s) display assembly  
   t) system board
3. Un-route and lift up the power-connector cable from the chassis to remove the power-connector port.

Installing the Power-Connector Port

1. Insert the power-connector port in its slot and route the power-connector cable to the chassis.
2. Install the:
   a) system board  
   b) display assembly  
   c) I/O board  
   d) video card  
   e) video-card heat sink  
   f) processor  
   g) processor heatsink  
   h) palm rest  
   i) video-card fan  
   j) processor fan  
   k) secondary memory  
   l) primary memory
m) hard drive
n) optical drive
o) keyboard
p) keyboard trim
q) base cover
r) battery
s) ExpressCard
t) SD card

3. Follow the procedures in After Working Inside Your Computer.

## Removing the Display Bezel

1. Follow the procedures in After Working Inside Your Computer.
2. Remove the battery.
3. Pry up the bottom edge of the display bezel.
4. Work your way around the sides and top edge of the display bezel and remove the display bezel from the computer.
Installing the Display Bezel

1. Slide in the display bezel from the bottom and press on the display bezel.

2. Work around the entire bezel until it snaps onto the display assembly.

3. Install the battery.
4. Follow the procedures in After Working Inside Your Computer.

**Removing the Display Panel**

1. Follow the procedures in Before Working Inside Your Computer.
2. Remove the:
   a) battery
   b) display bezel
3. Remove the screw that secures the display panel to the display assembly. Flip the display panel over.
4. Peel back the adhesive tape that secures the LVDS cable to the display panel.
5. Disconnect the LVDS cable.
6. Remove the screws that secure the display brackets to the display panel. Remove the display brackets.

7. **Installing the Display Panel**
   1. Align the display brackets to the display panel.
   2. Tighten the screws to secure the display brackets to the display panel.
   3. Connect the LVDS cable and affix the adhesive tape.
   4. Align the display panel in its original position on the computer.
   5. Tighten the screws to secure the display panel to the display assembly.
6. Install the:
   a) display bezel
   b) battery

7. Follow the procedures in *After Working Inside Your Computer*.

### Removing the Camera

1. Follow the procedures in *Before Working Inside Your Computer*.
2. Remove the:
   a) battery
   b) display bezel
3. Disconnect the camera cable. Remove the screw that secures the camera module to the computer. Remove the camera module from the computer.

### Installing the Camera

1. Place the camera module in its slot on the computer.
2. Tighten the screw to secure the camera module to the computer.
3. Connect the camera cable.
4. Install the:
   a) display bezel
   b) battery
5. Follow the procedures in *After Working Inside Your Computer*.
System Setup enables you to manage your computer hardware and specify BIOS-level options. From the System Setup, you can:

- Change the NVRAM settings after you add or remove hardware
- View the system hardware configuration
- Enable or disable integrated devices
- Set performance and power management thresholds
- Manage your computer security

**Topics:**

- Boot Sequence (開機順序)
- Navigation Keys
- System Setup Options
- Updating the BIOS
- 系統與設定密碼

### Boot Sequence (開機順序)

Boot Sequence (開機順序) 可讓您略過系統設定定義的啟動裝置順序，並直接開機至特定裝置（例如：光碟機或硬碟）。開機自我測試 (POST) 期間，當螢幕上出現 Dell 標誌時，您可以：

- 按下 <F2> 鍵存取系統設定
- 按下 <F12> 鍵顯示單次開機功能表

單次開機功能表會顯示可用的開機裝置，包括診斷選項。可用的開機功能表選項有：

- Removable Drive (卸除式磁碟機) (如有)
- STXXXX Drive (STXXXX 磁碟機)
  - **備註**: XXX 代表 SATA 磁碟機編號。
- Optical Drive (光碟機)
- Diagnostics (診斷)
  - **備註**: 選擇 Diagnostics (診斷) 將會顯示 ePSA diagnostics (ePSA 診斷) 畫面。

開機順序畫面也會顯示選項，讓您存取 System Setup (系統設定) 畫面。

### Navigation Keys

The following table displays the system setup navigation keys.

**NOTE:** For most of the system setup options, changes that you make are recorded but do not take effect until you re-start the system.

<table>
<thead>
<tr>
<th>Keys</th>
<th>Navigation</th>
</tr>
</thead>
<tbody>
<tr>
<td>Up arrow</td>
<td>Moves to the previous field.</td>
</tr>
<tr>
<td>Down arrow</td>
<td>Moves to the next field.</td>
</tr>
<tr>
<td>&lt;Enter&gt;</td>
<td>Allows you to select a value in the selected field (if applicable) or follow the link in the field.</td>
</tr>
<tr>
<td>Spacebar</td>
<td>Expands or collapses a drop-down list, if applicable.</td>
</tr>
<tr>
<td>&lt;Tab&gt;</td>
<td>Moves to the next focus area.</td>
</tr>
</tbody>
</table>

**NOTE:** For the standard graphics browser only.
System Setup Options

**NOTE:** Depending on your computer and installed devices, the items listed in this section may or may not appear.

### Table 2. General

<table>
<thead>
<tr>

<tr>
<td>• COM3</td>
<td></td>
</tr>
<tr>
<td>• COM4</td>
<td></td>
</tr>
</tbody>
</table>

**NOTE:** The operating system may allocate resources even if the setting is disabled.
**Option** | **Description**
---|---
**SATA Operation** | Allows you to configure the internal SATA hard-drive controller. The options are:
- **Disabled**
- **ATA**
- **AHCI**
- **RAID On** (Default Setting)

**NOTE:** SATA is configured to support RAID mode.

**Drives** | Allows you to configure the SATA drives on board. The options are:
- **SATA-0**
- **SATA-1**
- **SATA-3**
- **SATA-4**
- **SATA-5**

Default Setting: All drives are enabled.

**SMART Reporting** | This field controls whether hard drive errors for integrated drives are reported during system startup. This technology is part of the SMART (Self Monitoring Analysis and Reporting Technology) specification.

- **Enable SMART Reporting** — This option is disabled by default.

**USB Configuration** | Allows you to define the USB configuration. The options are:
- **Enable Boot Support**
- **Enable External USB Port**

Default Setting: both the options are enabled.

**USB PowerShare** | Allows you to configure the behavior of the USB PowerShare feature. This option is disabled by default.

- **Enable USB PowerShare**

**Miscellaneous Devices** | Allows you enable or disable the various on board devices. The options are:
- **Enable Fixed Bay**
- **Enable Microphone**
- **Enable ExpressCard**
- **Enable eSATA Ports**
- **Enable Camera**
- **Enable Hard Drive Free Fall Protection**
- **Enable Media Card and 1394**
- **Enable Media Card Only**
- **Disable MC, 1394**

Default Setting: The highlighted devices are enabled.

**Table 4. Video**

<table>

### Table 6. Performance

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
</table>
| Multi Core Support      | This field specifies whether the process will have one or all cores enabled. The performance of some applications will improve with the additional cores. This option is enabled by default. Allows you to enable or disable multi-core support for the processor. The options are:  
  - All (Default Setting)  
  - 1  
  - 2                                                                   |
| Intel SpeedStep         | Allows you to enable or disable the Intel SpeedStep feature.  
  Default Setting: Enable Intel SpeedStep                                                                                           |
| C States Control        | Allows you to enable or disable the additional processor sleep states.  
  Default Setting: The options C states, C3, C6, Enhanced C-states, and C7 options are enabled.                                        |
| Intel TurboBoost        | Allows you to enable or disable the Intel TurboBoost mode of the processor.  
  Default Setting: Enable Intel TurboBoost                                                                                          |
| Hyper-Thread Control    | Allows you to enable or disable the HyperThreading in the processor.  
  Default Setting: Enabled                                                                                                             |
| Rapid Start Technology  | Allows you to set the Rapid Start Technology feature. This feature is enabled by default. You can define the Rapid Start timer value.          |

### Table 7. Power Management

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
</table>
| AC Behavior             | Allows the computer to power-on automatically, when AC adapter is plugged. The option is disabled.  
  - Wake on AC                                                                                                         |
| Auto On Time            | Allows you to set the time at which the computer must turn on automatically. The options are:  
  - Disabled (Default Setting)  
  - Every Day  
  - Weekdays                                                                                                           |
| USB Wake Support        | Allows you to enable the USB devices to wake the computer from standby mode. The option is disabled  
  - Enable USB Wake Support                                                                                             |
| Wireless Radio Control  | Allows you to control the WLAN and WWAN radio. The options are:  
  - Control WLAN radio  
  - Control WWAN radio                                                                                                  |
|                          | Default Setting: both the options are disabled.                                                                                            |
| Wake on LAN/WLAN        | This option allows the computer to power up from the off state when triggered by a special LAN signal. Wake-up from the Standby state is unaffected by this setting and must be enabled in the operating system. This feature only works when the computer is connected to AC power supply.  
  - Disabled - Does not allow the system to power on by special LAN signals when it receives a wake-up signal from the LAN or wireless LAN. (Default Setting)  
  - LAN Only - Allows the system to be powered on by special LAN signals.  
  - WLAN Only  
  - LAN or WLAN                                                                                                         |
| Block Sleep             | Allows you to block the computer from entering into the sleep state. This option is disabled by default.                                    |
Option & Description

- Block Sleep (S3)

**Primary Battery Configuration**

Allows you to define how to use the battery charge, when AC is plugged in. The options are:

- Standard Charge
- Express Charge
- Predominantly AC use
- **Auto Charge** (Default Setting)
- Custom Charge — you can set the percentage to which the battery must charge.

**Note:** All charging modes may not be available for all the batteries.

**Battery Slice Configuration**

Allows you to define how to charge the battery. The options are:

- Standard Charge
- **Express Charge** (Default Setting)

**Table 8. POST Behavior**

Updating the BIOS

It is recommended to update your BIOS (system setup), on replacing the system board or if an update is available. For laptops, ensure that your computer battery is fully charged and connected to a power outlet.

1. Re-start the computer.
2. Go to dell.com/support.
3. Enter the Service Tag or Express Service Code and click Submit.
   
   **NOTE:** To locate the Service Tag, click Where is my Service Tag?

   **NOTE:** If you cannot find your Service Tag, click Detect My Product. Proceed with the instructions on screen.

4. If you are unable to locate or find the Service Tag, click the Product Category of your computer.
5. Choose the Product Type from the list.
6. Select your computer model and the Product Support page of your computer appears.
7. Click Get drivers and click View All Drivers.
   
   The Drivers and Downloads page opens.
8. On the Drivers and Downloads screen, under the Operating System drop-down list, select BIOS.
9. Identify the latest BIOS file and click Download File.
   
   You can also analyze which drivers need an update. To do this for your product, click Analyze System for Updates and follow the instructions on the screen.
10. Select your preferred download method in the Please select your download method below window; click Download File.
    
    The File Download window appears.
11. Click Save to save the file on your computer.
12. Click Run to install the updated BIOS settings on your computer.
Assigning a System Password and Setup Password

You can assign a new **System Password** and/or **Setup Password** or change an existing **System Password** and/or **Setup Password** only when **Password Status** is **Unlocked**. If the **Password Status** is **Locked**, you cannot change the System Password.

To enter a system setup, press `<F2>` immediately after a power-on or re-boot.

1. In the **System BIOS** or **System Setup** screen, select **System Security** and press `<Enter>`. The **System Security** screen appears.
2. In the **System Security** screen, verify that **Password Status** is **Unlocked**.
3. Select **System Password**, enter your system password, and press `<Enter>` or `<Tab>`.

   Use the following guidelines to assign the system password:
   - A password can have up to 32 characters.
   - The password can contain the numbers 0 through 9.
   - Only lower case letters are valid, upper case letters are not allowed.
   - Only the following special characters are allowed: space, ("), (+), (-), (,), (.), (\), (\), (_) , (`).

   Re-enter the system password when prompted.
4. Type the system password that you entered earlier and click **OK**.
5. Select **Setup Password**, type your system password and press `<Enter>` or `<Tab>`.
   A message prompts you to re-type the setup password.
6. Type the setup password that you entered earlier and click **OK**.
7. Press `<Esc>` and a message prompts you to save the changes.
8. Press `<Y>` to save the changes.

The computer reboots.

**System Setup**
5. 按下 <Esc>，畫面上便會出現提示您儲存變更的訊息。

6. 按下 <Y> 即可儲存變更，並結束系統設定。
   電腦會重新啟動。
如果在使用電腦時遇到問題，在聯絡 Dell 尋求技術協助之前，請先執行 ePSA 診斷。執行診斷的目的在於不使用其他設備來測試系統硬體，而不會有資料遺失的風險。如果您無法自行修正問題，維修及支援人員亦可參考診斷結果，以協助您解決問題。

主題:

- 增強型開機前系統評估 (ePSA) 診斷

增強型開機前系統評估 (ePSA) 診斷

ePSA 診斷 (又稱為系統診斷) 會執行完整的硬件檢查。ePSA 會內嵌於 BIOS，並會由 BIOS 內部啟動。內嵌系統診斷會針對特定裝置或裝置群組提供一組選項，可讓您:

- 自動執行測試或使用互動模式
- 重複測試
- 顯示或儲存測試結果
- 完整地執行測試，並顯示其他測試選項，以提供有關故障裝置的其他資訊
- 檢視狀態訊息，通知您測試是否成功完成
- 檢視錯誤訊息，通知您在測試期間遇到的問題

警示: 系統診斷只能測試您的電腦。在其他電腦上使用此程式可能會導致結果無效或出現錯誤訊息。

備註: 特定裝置的某些測試需要使用者手動操作。執行這些診斷測試時，請確定您親自在電腦終端機前操作。

1. 啟動電腦。
2. 電腦啟動後，請在出現 Dell 標誌時按下 <F12> 鍵。
3. 在啟動選單畫面中，選擇 Diagnostics (診斷) 選項。
   Enhanced Pre-boot System Assessment (增強型開機前系統評估) 視窗隨即顯示，列出在電腦中偵測到的所有裝置。診斷會開始對所有偵測到的裝置執行測試。
4. 如果您要對特定裝置執行診斷測試，請按下 <Esc>，然後按一下 Yes (是) 以停止診斷測試。
5. 從左側窗格選擇裝置，然後按一下 Run Tests (執行測試)。
6. 如果發生任何問題，將會顯示錯誤代碼。請記下錯誤代碼並與 Dell 公司聯絡。
Troubleshooting Your Computer

Device Status Lights

Table 13. Device Status Lights

- Turns on when you turn on the computer and blinks when the computer is in a power management mode.
- Turns on when the computer reads or writes data.
- Turns on steadily or blinks to indicate battery charge status.
- Turns on when wireless networking is enabled.

The device status LEDs are usually located either on the top or left side of the keyboard. They are used to display the storage, battery and wireless devices connectivity and activity. Apart from that they can be useful as a diagnostic tool when there’s a possible failure to the system.

The following table lists how to read the LED codes when possible errors occur.

Table 14. LED Lights

電池狀態指示燈

如果電腦已連接至電源插座，電池指示燈會呈現以下幾種狀態：

- 交替熒光琥珀色指示燈及白燈指示燈：未驗證或不支援的非 Dell AC 變壓器已連接至筆記型電腦。
- 交替熒光琥珀色指示燈及恆亮白色指示燈：使用 AC 變壓器時電池出現暫時的故障。
- 持續熒光琥珀色指示燈：使用 AC 變壓器時電池出現嚴重的故障。
- 指示燈熄滅：使用 AC 變壓器時電池處於完全充電模式。

### Feature | Specification
--- | ---
**Video controller and memory:**
- **M4700**
  - AMD FirePro M4000 with 1 GB GDDR5
  - NVIDIA Quadro K1000M with 2 GB GDDR3
  - NVIDIA Quadro K2000M with 2 GB GDDR3

- **M6700**
  - AMD FirePro M6000 with 2 GB GDDR5
  - NVIDIA Quadro K3000M with 2 GB GDDR3
  - NVIDIA Quadro K4000M with 4 GB GDDR5
  - NVIDIA Quadro K5000M with 4 GB GDDR5

### Table 37. Audio

| Feature | Specification |
--- | --- |
Integrated | dual-channel High-Definition audio |

### Table 38. Communication

| Feature | Specification |
--- | --- |
**Network adapter** | network interface card capable of 10/100/1000 Mb/s communication |
**Wireless**
- internal wireless local area network (WLAN)
- internal wireless wide area network (WWAN)
- bluetooth wireless support |

### Table 39. Expansion Bus

| Feature | Specification |
--- | --- |
**Bus Type** | PCI 2.3, PCI Express 1.0 and 2.0, SATA 1.0A, 2.0 and 3.0, USB 2.0 and 3.0 |
**Bus Width** | PCIe X16 |
**BIOS Chip (NVRAM)** | 96 Mb (12 MB) |

### Table 40. Ports and Connectors

| Feature | Specification |
--- | --- |
**Audio** | two connectors for line-out and line-in/microphone |
**Network Adapter** | one RJ45 connector |
**USB 2.0** | two |
**USB 3.0** | two |
**eSATA\USB 2.0** | one |
**IEEE1394:**
- **M4700** | one 4-pin IEEE 1394 connector |
- **M6700** | one 6-pin IEEE 1394 connector |
**Video** | 15-pin VGA connector, 19-pin HDMI connector, 20-pin DisplayPort connector |
**Memory card reader** | one 8-in-1 memory card reader |
**Docking port** | one |
**Subscriber Identity Module (SIM) port** | one |
**ExpressCard** | one |
**Smart card (optional)** | one |

### Drives configurations:

- **M4700**: one internal 2.5 inch SATA HDD/SSD (SATA3) + one mSATA SSD (SATA2)
- **M6700**: two internal 2.5 inch SATA HDD/SSD (SATA3) + one mSATA SSD (SATA2)

### Size

- 1 TB 5400 rpm, 320/500/750 GB 7200 rpm, 320 GB 7200 rpm SED FIPS; 128/256/512 GB SATA 3 SSD, 256 GB SATA 3 SSD

**NOTE:** The size of the hard drive is bound to change. For more information, see dell.com.

### Optical Drive:

- **Interface**
  - SATA 1 (1.5 Gb/s)
  - SATA 2 (3.0 Gb/s)
- **Configuration**
  - support ODD modules and Air Bay with SATA HDD option

聯絡 Dell

備註: 如果您沒有有效的互聯網連線，則您可以在購機發票、裝箱單、帳單或 Dell 產品目錄中找到聯絡資料。

Dell 提供多種線上和電話支援與服務選項。可用性視國家/地區及產品而異，且某些服務在您所在地區可能無法使用。如需聯絡 Dell 解決銷售、技術支援和客戶服務問題，請：

1. 轉至 dell.com/support。
2. 選擇您的支援類別。
3. 在頁面底部的「選擇國家/地區」下拉清單中確認您所在國家或地區。
4. 根據您的需求選擇相應服務或支援連結。
