Software Requirements

The following list identifies the minimum software requirements for using the Dell Storage vSphere Web Client Plugin.

- Minimum Enterprise Manager: 2015 R3
- Minimum Storage Center OS version: 6.5
- Minimum VMware ESXi version: 5.5
- Minimum VMware vCenter Web Client Server version: 5.5
- Minimum FluidFS version: 4.0.100714

⚠️ NOTE: For 2016 and later, Enterprise Manager is called Dell Storage Manager.
New Features and Enhancements in Version 4.0

Version 4.0 of the Dell Storage vSphere Web Client Plugin provides the following enhancement:

You can now select among multiple disk folders:

- When adding a datastore or RDM using a new Dell volume
- When deploying virtual machines to a new VMSF datastore
- When specifying a replication target location

Known Issues in Version 4.0

The following known issues are reported in the Dell Storage vSphere Web Client Plugin version 4.0.
