</tr>
<tr>
<td></td>
<td>Runtime Fault summary error may occur when creating a datastore, mapping an existing volume, recovering VM data from a Snapshot, or enabling Live volume high consistency for a datastore.</td>
</tr>
<tr>
<td>VSWP-112</td>
<td>When creating a Snapshot schedule for a datastore, if the time is set to 12:00 AM or 12:00 PM, it will appear as 12:00 PM or 12:00 AM respectively.</td>
</tr>
<tr>
<td>VSWP-199</td>
<td>Compression and QoS options can be selected in the vSphere Client even though the profile selections are disabled in Dell Storage Manager.</td>
</tr>
<tr>
<td>VSWP-341</td>
<td>The Dell icon is visible on the Home page even after the plugin is unregistered.</td>
</tr>
</tbody>
</table>

**Workaround**

- **Windows:**
  1. Log in to the vSphere Web Client with a vCenter Single Sign-on administrator account.
  2. Navigate to **Administration > Deployment > System Configuration**.
  3. Click on **Services** to view the list of all services within the vCenter Server system.
  4. To view the services for a specific node, click **Nodes**, select the node in question and click the **Related Objects** tab.
  5. Right-click on the **vSphere Web Client Service** to restart and select **Restart**.

- **Linux:**
  1. Log in to vCenter server through PuTTY.
  2. Go to the root folder.
  3. Run the following commands:
     - `service-control --stop vsphere-client`
     - `service-control --start vsphere-client`

Installation Instructions

The **Dell Storage Integration Tools for VMware Administrator’s Guide** provides installation instructions the vSphere Web Client Plugin. The **Dell Storage vSphere Web Client Plugin Administrator’s Guide** provides instructions for configuring the plugin.
